

Chapter 02

Theories and Treatment of Abnormality

1. Which of the following best defines a theory?

- A. A theory is a set of ideas that relate only to observed behaviors.
- B. A theory is a treatment, usually based on a phenomenon, which addresses those factors that cause the phenomenon.
- C. A theory is a set of ideas that bridges the gap between normal and abnormal behaviors.
- D. A theory is a set of ideas that provides a framework for asking questions about a phenomenon and for gathering and interpreting information about that phenomenon.**

Page: 24

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Describe the scientific method

Topic: Scientific Method

2. A _____ is a treatment, usually based on a theory of a phenomenon, that addresses those factors the theory says cause the phenomenon.

- A. practice
- B. modus operandi
- C. therapy**
- D. hypothesis

Page: 24

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Explain how treatment is planned.

Topic: Treatment

3. A psychologist who applies a sociocultural approach to anxiety disorders would:

- A. consider genetics as a likely explanation for anxiety.
- B. consider the way cultural values or the social environment affect anxiety.**
- C. look for the causes of anxiety in people's beliefs, thought processes, life experiences, and relationships.
- D. explain anxiety by taking into account a person's unconscious desires.

Page: 24

Accessibility: Keyboard Navigation

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Assess the theories of the sociocultural perspective and identify treatments.

Topic: Anxiety Disorders

Topic: Sociocultural Approach

4. Maria and her parents recently moved to a new state because her mother received a job transfer. Maria has had difficulty adjusting to her new school, and has been suffering from loss of appetite, irritability, and lack of interest in her usual activities. Assuming that Maria's behavior meets the criteria for abnormal behavior, which of the following approaches would best explain Maria's behavior?

- A. Psychological approach**
- B. Nature approach
- C. Personal approach
- D. Biological approach

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Compare and contrast the perspectives of abnormal psychology.

Topic: Psychological Perspective

5. Which of the following best describes the nature-nurture question of abnormality?

- A. The nature-nurture question relies heavily on biological perspectives to address abnormal behaviors.
- B. The nature-nurture question views abnormal behaviors exclusively from a sociological perspective.
- C. The nature-nurture question integrates biological, psychological, and social approaches to abnormal behaviors.
- D. The nature-nurture question supports the idea that psychological problems must have a single cause**

Page: 24

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Compare and contrast the perspective of abnormal psychology.

Topic: Nature vs. Nurture

6. Which of the following statements is true about the diathesis-stress model of the development of disorders?

- A. A biological, psychological, or social vulnerability combines with a biological, psychological, or social trigger, causing a disorder to manifest.
- B. An individual experiences a minimal amount of psychological and social stress that creates an atmosphere for the emergence of a disorder.
- C. Biological factors and psychological factors interact and create social stressors that influence a disorder.
- D. Psychological and social vulnerability are loosely associated with a specific disorder and biological factors are the main contributors to the disorder.

Page: 25

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Explain the biopsychosocial perspective.

Topic: Diathesis-Stress Model

7. Which of the following statements is true regarding the different approaches to abnormality and the continuum model?

- A. People who favor a sociocultural approach generally embrace the continuum model because they view psychological disorders as vastly different from normal functioning.
- B. People who take a biological approach have traditionally accepted the continuum model of abnormality.
- C. People who adopt a psychological approach have moved away from the continuum model of psychopathology in recent years.
- D. Proponents of the sociocultural approach tend to view abnormal behaviors as understandable consequences of social stresses in people's lives.

Page: 24

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Compare and contrast the perspective of abnormal psychology.

Topic: Approaches to Abnormal Psychology

8. The biological approach to abnormality focuses on all of the following causes of abnormality EXCEPT:

- A. brain dysfunction.
- B. genetic abnormalities.
- C. biochemical imbalance.
- D. poor physiological responses.

Page: 26

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

9. Which of the following statements is true about the various structures of the brain?

- A. The pons control arousal and attention to stimuli.
- B. The medulla is important for attentiveness and the timing of sleep.
- C. The cerebellum helps control breathing and reflexes.
- D. The superior colliculus and inferior colliculus relay sensory information and control movement.

Page: 27

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

10. The outer layer of the cerebrum is called the _____.

- A. hippocampus
- B. cerebral cortex
- C. thalamus
- D. cerebellum

Page: 27

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

11. The cerebral cortex is responsible for:

- A. regulating sexual drive.
- B. advanced thinking processes.**
- C. relaying messages to the brain.
- D. impulse control.

Page: 27

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

12. Abnormality in eating, drinking, and sexual behavior is most likely a result of the dysfunction of the:

- A. right frontal lobe.
- B. cerebrum.
- C. hypothalamus.**
- D. midbrain.

Page: 28

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

13. Which of the following statements is true of subcortical structures in the brain?

- A. They contain the thalamus, which directs incoming information from sense receptors to the cerebrum.**
- B. They contain the hypothalamus, which is a large structure just above the thalamus that regulates instinctive behaviors.
- C. They contain the hippocampus, a part of the limbic system, which plays a central role in emotions such as fear.
- D. They contain the amygdala, a structure of the limbic system, which plays a role in memory.

Page: 28

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

14. Cindy's mood has become increasingly unstable since her traffic accident, in which she obtained a serious brain injury. She often experiences bouts of aggression and fits of rage in reaction to the slightest provocation. At other times, she is overly passive and fails to recognize direct threats. In which area of Cindy's brain has the damage most likely occurred?

- A. The temporal lobe
- B. The limbic system**
- C. The cerebellum
- D. The medulla

Page: 28

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

15. Biochemicals that carry impulses from one neuron to another in the brain and in other parts of the nervous system are called ____.

- A. hormones
- B. neurotransmitters**
- C. electrical transmissions
- D. synaptic responses

Page: 29

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

16. Neurotransmitters are released into the _____, the gap between synaptic terminals and adjacent neurons, and then bind to special _____, molecules on the membrane of adjacent neurons.

- A. receptor; dendrites
- B. synapse; receptors**
- C. synapse; axons
- D. receptor; cell bodies

Page: 29

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

17. When the initial neuron releasing a neurotransmitter into the synapse reabsorbs some of the neurotransmitter and thereby decreases the amount of neurotransmitter left in the synapse, the process is called _____.

- A. reuptake**
- B. degradation
- C. blocking
- D. carrying

Page: 29

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

18. In the context of neurotransmitter functioning, degradation refers to the:

- A. release of neurons into the synaptic gap.
- B. reabsorption of the neurotransmitter into the initial neuron.
- C. attachment of the neurotransmitter to a receptor.
- D. release of an enzyme by the receiving neuron that breaks down the neurotransmitter into other biochemicals.**

Page: 29

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

19. Which of the following neurotransmitters plays an important role in regulating emotional well-being and aggressive impulses?

- A. Dopamine
- B. Norepinephrine
- C. Acetylcholine
- D. Serotonin**

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

20. Dopamine plays an important role in:

- A. regulating sexual drive and emotional responses.
- B. regulating the functioning of muscle systems.**
- C. regulating pain and moods.
- D. inhibiting aggression.

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

21. When ingested, which of the following substances slows the reuptake process of norepinephrine?

- A. Cocaine and heroin

- B. Heroin and marijuana
- C. Marijuana and amphetamines
- D. Amphetamines and cocaine**

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

22. In the context of emotional responses, gamma-aminobutyric acid (GABA) plays an important role in _____ symptoms.

- A. anxiety**
- B. depressive
- C. angry
- D. aggressive

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

23. A _____ is a chemical that carries messages throughout the body, potentially affecting a person's moods, levels of energy, and reactions to stress.

- A. hormone**
- B. degradation inhibitor
- C. neuron
- D. synapse

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

24. The "master" gland is also known as the _____.

- A. pancreatic gland
- B. organ of Corti
- C. adrenal gland
- D. pituitary gland**

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

25. The pituitary gland is responsible for:

- A. stabilizing mood and emotions.
- B. controlling brain function and relaying messages.
- C. regulating energy levels and managing aggression.
- D. producing a variety of hormones and controlling the secretion of other endocrine glands.**

Page: 30

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

26. When corticotropin-release factor (CRF) travels from the hypothalamus to the pituitary, the pituitary releases the body's adrenocorticotrophic hormone (ACTH). The bloodstream carries ACTH to the adrenal gland and various other organs. This example illustrates the complex relationship between:

- A. the pituitary gland and hormones.
- B. hormones and the endocrine system.
- C. the endocrine system and the pituitary gland.

D. the central nervous system and the endocrine system.

Page: 30–31

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

27. Mark has difficulty managing his stress. His physician suspects that he has a dysregulated hypothalamic-pituitary-adrenal axis (HPA axis). It is likely that Mark may later be diagnosed with a(n):

- A. personality disorder.
- B.** depressive disorder.
- C. adjustment disorder.
- D. impulse control disorder.

Page: 31

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

28. Which of the following is correct regarding chromosomes?

- A. At conception, the fertilized embryo has 48 chromosomes, 24 from the female egg and 24 from the male sperm.
- B. The mother of an embryo always contributes a Y chromosome and the father always contributes an X chromosome.
- C.** Down syndrome results when chromosome 21 is present in triplicate instead of as the usual pair.
- D. Chromosomes have no relationship to deoxyribonucleic acid (DNA).

Page: 31

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

29. Sandy was born with a flat face, a small nose, protruding lips and tongue, and slanting eyes. These features were a result of chromosome 21 being present in triplicate. Sandy was most likely born with _____.

- A. Klinefelter syndrome
- B.** Down syndrome
- C. Tay-Sachs disease
- D. Fragile X syndrome

Page: 31

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

30. Which of the following is NOT true about behavior genetics?

- A. Behavior genetics is the study of the genetics of personality and abnormality.
- B.** Research in behavior genetics focuses primarily on twin studies
- C. According to behavior genetics, most disorders result from polygenic processes.
- D. Behavior geneticists investigate the heritability of behaviors and behavioral tendencies.

Page: 31–32

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

31. A polygenic process:

- A.** refers to the multiple genetic abnormalities that interact in one individual to create a disorder.
- B. results from the interaction between hormones and neurotransmitters.
- C. creates the coded instructions for cells to perform certain functions.
- D. controls the basic genetic transmission that occurs during conception.

Page: 32

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

32. Identical twins have _____ of their genes in common.

- A. 25 percent
- B. 50 percent
- C. 75 percent
- D. 100 percent**

Page: 32

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

33. Which of the following is NOT true about the interaction between genes and the environment?

- A. Genetic factors can influence the kinds of environments we choose.
- B. The environment can act as a catalyst for a genetic tendency.
- C. Environmental conditions can affect the expression of genes.
- D. Personalities and interests are not reinforced by the environments we choose.**

Page: 32

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

34. _____ is the study of heritable changes in the expression of genes without changes in the gene sequence.

- A. Molecular biology
- B. Genetic engineering
- C. Epigenetics**
- D. Molecular cloning

Page: 33

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

35. The research on epigenetic processes carried out by Michael Meany found that:

- A. the behavior of mother rats toward their offspring influences the development of the pups' reactions to stress in adulthood.**
- B. the extent to which a mother rat grooms the pup in the first week of life is indirectly related to the release of certain hormones in the pup.
- C. pups that are licked and groomed more tend to grow into adult rats that are more fearful and show less developed responses to stress.
- D. the biological offspring of mothers who typically lick and groom less, when raised by mothers who lick and groom more, have less effective stress responses

Page: 33

Accessibility: Keyboard Navigation

APA Outcome: 2.1 Use scientific reasoning to interpret psychological phenomena.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

36. Which of the following statements is true about the different drug therapies?

- A. Phenothiazines, also known as atypical antipsychotics, are used to reduce hallucinations and delusions, and do not carry dangerous side effects.
- B. Selective serotonin reuptake inhibitors (SSRIs) are the most frequently used antidepressants and target both serotonin and norepinephrine.
- C. Tricyclic antidepressants and monoamine oxidase inhibitors are the newer classes of antidepressants.
- D. SSRIs produce side effects such as nausea, diarrhea, headaches, daytime sedation, sexual dysfunction, and agitation.**

Page: 34

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Name and describe drugs used in the treatment of abnormal behavior, and discuss the problems and controversies surrounding their use.

Topic: Drug Therapy

37. Lithium is:

- A. a rare metallic element found only in natural springs.
- B. a safer treatment than anticonvulsants because it has fewer and milder side effects.
- C. commonly used in the treatment of bipolar disorder.**
- D. very effective in reducing tardive dyskinesia.

Page: 34

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Name and describe drugs used in the treatment of abnormal behavior, and discuss the problems and controversies surrounding their use.

Topic: Drug Therapy

38. A major class of anxiety-reducing drugs, _____, appears to reduce the symptoms of anxiety without interfering substantially with an individual's ability to function in daily life. Their most frequent use of these drugs is as sleeping pills.

- A. barbiturates
- B. benzodiazepines**
- C. azapirones
- D. beta-blockers

Page: 34

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Name and describe drugs used in the treatment of abnormal behavior, and discuss the problems and controversies surrounding their use.

Topic: Drug Therapy

39. Electroconvulsive therapy (ECT) was originally introduced to treat which mental disorder?

- A. Obsessive-compulsive disorder
- B. Panic disorder without agoraphobia
- C. Generalized anxiety disorder
- D. Schizophrenia**

Page: 34

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

40. Which of the following statements is true of electroconvulsive therapy (ECT)?

- A. A current of 70 to 150 volts is passed through the brain for five seconds.
- B. Patients are fully conscious when the brain seizure is induced.
- C. Patients typically have a convulsion, which usually lasts three minutes or more.
- D. The side effects of ECT involve confusion and memory loss.**

Page: 35

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

41. When treating a patient with electroconvulsive therapy (ECT), approximately how many sessions are necessary?

- A. 4 to 6 sessions
- B. 5 to 8 session
- C. 6 to 15 sessions
- D. 6 to 12 sessions**

Page: 35

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

42. A procedure known as _____ exposes patients to frequent, high-intensity magnetic pulses that are focused on particular brain structures, whereas in the _____ procedure, electrodes are surgically implanted in specific areas of the brain.

- A. repetitive transcranial magnetic stimulation; deep brain stimulation
- B. deep brain stimulation; vagus nerve stimulation
- C. vagus nerve stimulation; repetitive transcranial magnetic stimulation
- D. deep brain stimulation; repetitive transcranial magnetic stimulation

Page: 35

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

43. The procedure introduced by neurologist Antonio de Egas Moniz in 1935, in which the frontal lobes of the brain are severed from the lower centers of the brain in people with psychosis is called:

- A. partial lobectomy.
- B. prefrontal lobotomy.
- C. vagus nerve stimulation.
- D. craniotomy.

Page: 35

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Psychosurgery

44. Today, psychosurgery:

- A. is outlawed in the United States.
- B. is only used for severe disorders that do not respond to other treatments.
- C. is no longer controversial, as it formerly was.
- D. is found to generally lack precision.

Page: 35

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Psychosurgery

45. Which of the following is a criticism leveled against the biological approach to abnormality?

- A. It often ignores the fact that environmental and psychological processes can affect biological functioning.
- B. It argues that people prefer to deal with the issues in their lives that are contributing to their psychological problems rather than turn to drugs.
- C. It seems to increase the blame or responsibility that might be put upon the sufferer of a disorder.
- D. It forces people who suffer from disorders to deny that they have a disease and therefore remedy their disease through cognitive restructuring.

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

46. Behavioral theorists:

- A. accept the idea that unconscious conflicts drive human behavior.
- B. include biological factors as major contributors to abnormal behavior.
- C. view maladaptive thinking patterns as the primary motivators for abnormal behavior.
- D. focus on the influence of reinforcement and punishment in producing abnormal behavior.

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Behavioral Perspective

47. What are the core principles of the behavioral approach?

- A. Classical reinforcement and operant conditioning
- B. Operant punishment and vicarious reinforcement
- C. Classical conditioning and operant conditioning**
- D. Operant conditioning and latent learning

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Behavioral Perspective

48. The Russian physiologist whose discovery of conditioned responses made a tremendous impact on psychology was ____.

- A. B. F. Skinner
- B. John Watson
- C. Edward Thorndike
- D. Ivan Pavlov**

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.2 Develop a working knowledge of psychology's content domains.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Classical Conditioning

49. In Pavlov's experiment, the conditioned stimulus was:

- A. the event that elicited the unlearned response.
- B. the previously neutral stimulus.**
- C. the reinforcement that elicited the learned response.
- D. the same as the unconditioned stimulus.

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 2.1 Use scientific reasoning to interpret psychological phenomena.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Classical Conditioning

50. Alexis is a sick child who makes frequent visits to the hospital to get her shots. One day she and her mother drive past the hospital and Alexis begins to cry. She repeatedly says, "Mommy, I don't want to see the doctor." In this example, the conditioned stimulus would be ____.

- A. the parking lot
- B. the shot
- C. the nurse
- D. the hospital**

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Classical Conditioning

51. A bee stung Leah while she was playing in the yard a few weeks ago. She now becomes panicky each time she goes out to play. In this example, the conditioned stimulus is ____.

- A. being stung
- B. playing outside**
- C. seeing the bee
- D. feeling panicky

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Classical Conditioning

52. The law of effect suggests that:

- A. the strength of a reward has no bearing on behaviors.
- B. punishment has no impact on undesired behaviors.

- C. behaviors followed by a reward are strengthened.
D. punishments are more effective than rewards.

Page: 36

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

53. Shaping behaviors by providing rewards for desired responses and punishments for undesired responses is known as ____.

- A. classical conditioning
B. operant conditioning
C. respondent conditioning
D. avoidant conditioning

Page: 37

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

54. Which of the following is NOT an example of a behavior learned through operant conditioning?

- A. An adolescent washes his father's car hoping to get a curfew extension.
B. A person jumps back at the sight of a snake.
C. A prison inmate receives tokens for good behavior.
D. An animal stays still to avoid an electric shock.

Page: 37

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

55. Tracy always seemed to "forget" to do her weekly chores, despite many reminders by her mom and dad. Her parents decided to pay her \$2 for each chore she completed by Sunday night each week. On which type of operant conditioning schedule did Tracy's parents put her?

- A. Continuous reinforcement schedule
B. Partial reinforcement schedule
C. Continuous punishment schedule
D. Partial punishment schedule

Page: 36-37

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

56. When a learned behavior is eliminated, the process is called ____.

- A. removal
B. extinction
C. disappearance
D. avoidance

Page: 37

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

57. In the context of the schedules of reinforcement in operant conditioning, if a behavior is ____ reinforced, it is more difficult to extinguish.

- A. negatively
B. intermittently
C. continuously
D. positively

Page: 37

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

58. Jessica had a car accident while crossing an icy bridge. She now maps out her routes to avoid traveling over bridges. This avoidance helps to reduce her anxiety. In this example, Jessica has developed a(n) _____.

- A. unconditioned response
- B. conditioned avoidance response**
- C. continuous reinforcement schedule
- D. unconditioned avoidance response

Page: 37

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Operant Conditioning

59. Social learning theory posits that:

- A. people learn behaviors by watching other people.**
- B. people learn as a direct result of rewards and punishments.
- C. people learn primarily by observing random people.
- D. people learn when two stimuli are paired together.

Page: 38

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Social Learning Theory

60. Joe's favorite food is spaghetti. His mom always makes it for him on Friday night, but she does not like the way he slurps the spaghetti into his mouth. One Friday night, she attempts to change Joe's eating pattern. At dinner, she picks up her spoon and fork and begins to roll the spaghetti. David, Joe's brother, used his fork and spoon as well. Susan, Joe's sister, also used her fork and spoon to roll her spaghetti. At first, Joe slurps the spaghetti into his mouth, but after a few minutes, he begins to use his fork and spoon as well.

In this example, Joe is learning behavior through _____.

- A. shaping
- B. modeling**
- C. reinforcing
- D. acquiring

Page: 37

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Social Learning Theory

61. Jerry, who can't sit still for a minute, sees his classmate, Mike, getting a sticker for sitting quietly in his seat. Jerry decides to stop fidgeting and begins to sit still in the hope of getting a sticker for his sticker collection. Which behavioral theory is in effect here?

- A. Classical conditioning
- B. Observational learning**
- C. Systematic desensitization
- D. Causal attribution

Page: 37–38

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Social Learning Theory

62. When Kathryn was visiting her grandmother one summer, a snake crawled onto the front porch and bit her. Since then, Kathryn has been dreadfully afraid of snakes. Which technique would a behavioral therapist most likely use in this situation to help Kathryn get rid of her phobia?

- A. Modeling**

- B.** Systematic desensitization
- C. Operant conditioning
- D. Reinforcement

Page: 38

Accessibility: Keyboard Navigation

APA Outcome: 1.3 Describe applications of psychology.

Bloom's: Apply

Difficulty: Difficult

Learning Objective: Assess the theories of the behavioral perspective and identify treatments.

Topic: Behavioral Perspective

63. Which of the following statements is true about systematic desensitization therapy?

- A. It requires the client to first develop a hierarchy of feared stimuli and then learn appropriate responses to each of these stimuli, starting with the most feared stimulus.
- B. It is an immediate and direct method for extinguishing anxiety responses to stimuli and maladaptive behavior.
- C.** It generally produces better results when the client is asked to experience the stimuli directly, that is, using the in vivo exposure method.
- D. It is often combined with operant conditioning to develop a conditioned avoidance response.

Page: 39

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Assess the theories of the behavioral perspective and identify treatments.

Topic: Behavioral Perspective

64. All of the following are limitations of behavioral theories EXCEPT that:

- A. it is unclear how behavioral principles could account for some disorders, such as schizophrenia.
- B.** the studies done to test these theories are rigorously controlled and exact.
- C. the complexity of human behaviors and the environmental experiences cannot be captured in laboratory studies.
- D. behavioral theories do not recognize free will in people's behavior.

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Family Therapy

115. Research on family systems approaches and therapies is difficult because:

- A. the research involves observing people in the context of their relationships, which is difficult to capture in the laboratory.**
- B. these approaches often do not receive adequate funding for research as they are not recognized as a formal therapeutic approach.
- C. these approaches are relatively new and very few professionals have expertise in this area.
- D. families are always in a state of flux and findings may lack validity and reliability.

Page: 47

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Psychodynamic Perspective

117. _____ therapy focuses on difficulties in managing negative emotions and in controlling impulsive behaviors.

- A. Dialectical behavior**
- B. Acceptance and commitment
- C. Client-centered
- D. Interpersonal

Page: 47

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Psychodynamic Perspective

118. A key assumption behind acceptance and commitment therapy is that _____, that is, ignoring painful thoughts, memories, and feelings, is/are at the heart of many mental health problems.

- A. repressed emotions

- B. denial
- C. experiential avoidance**
- D. poor emotional regulation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the sociocultural approach to abnormal psychology.

Topic: Sociocultural Perspective

120. Which of the following statements is indicative of culturally sensitive approaches that therapists may use when treating clients?

- A. Persuading clients from cultures that value respect for authority to generate ideas about what is causing their symptoms
- B. Strengthening the socio-economic and class differences that exist in the client-therapist relationship
- C. Forcing clients from cultures that value emotional restraint to express themselves and disclose all their personal concerns
- D. Recognizing that certain cultures focus on the collective and that the identity of the individual is not seen apart from the group**

Page: 49

Accessibility: Keyboard Navigation

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the sociocultural approach to abnormal psychology.

Topic: Multicultural Approach

121. Which of the following statements is true about cross-cultural treatment?

- A. Ethnic matching is an important predictor of how long clients remain in therapy.
- B. A therapist must be from the same culture as the client to fully understand the client.
- C. Matching the race or ethnicity of the therapist and the client does not necessarily lead to a better outcome.**
- D. It has been proven that therapists from the same ethnic or racial group as the client share the same value system.

Page: 52

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Analyze the sociocultural approach to abnormal psychology.

Topic: Multicultural Approach

122. In the context of cross-cultural treatment, which of the following statements is true?

- A. Evidence suggests that women, but not men, do better in therapy with a therapist of the same gender.
- B. Both women and men tend to report that they prefer a therapist of the same gender.**
- C. Certain treatments are more effective among certain cultural/ethnic groups than others.
- D. People from ethnic minority groups in the United States are less likely than European Americans to drop out of psychosocial therapy.

Page: 52

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Assess the theories of the sociocultural perspective and identify treatments.

Topic: Multicultural Approach

124. Hispanics in the southwestern United States and in Mexico suffering from psychological problems may consult folk healers, known as:

- A.** curanderos.
- B. nganga.
- C. quimbanda.
- D. shamans.

Page: 52

Accessibility: Keyboard Navigation

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Assess the theories of the sociocultural perspective and identify treatments.

Topic: Multicultural Approach

125. Which of the following is a valid criticism leveled against the sociocultural approaches of abnormality?

- A. They argue that it is not enough to look only at what is going on within individuals or their immediate surroundings.
- B. They blame the victim and place responsibility for psychopathology within the individual.
- C. They relieve society of its responsibility to change the social conditions that put individuals at risk for psychopathology.
- D.** They provide only a vague understanding about the exact ways in which social and cultural forces lead to psychological disturbance in individuals.

Page: 52

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Remember

Difficulty: Easy

Learning Objective: Discuss treatment outcomes.

Topic: Treatment

128. What are neurotransmitters and how do they function? Using examples, describe the role neurotransmitters play in mental health.

Students' answers may vary. Key terms and concepts that may be included in student responses:

- Neurotransmitters—biochemicals that act as messengers carrying impulses

- Synaptic gap—gap between the synaptic terminals and the adjacent neurons
- Receptors—molecules on the membrane of adjacent neurons
- Processes of reuptake and degradation of neurotransmitters—malfunctioning of either process results in high or low levels of neurotransmitter in the synapse
- Serotonin—plays an important role in emotional well-being and in dysfunctional behaviors
- Dopamine—influences our experience of reinforcements or rewards and the functioning of muscle systems
- Norepinephrine—cocaine and amphetamine slows its reuptake
- Gamma-aminobutyric acid (GABA)—inhibits the action of other neurotransmitters

Page: 29–30

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the biological approach to abnormal psychology.

Topic: Biological Perspective

129. Describe the learning process of classical conditioning and operant conditioning. Provide examples for these theories based on your experiences.

Key terms and concepts that may be included in student responses:

- Classical conditioning—unconditioned response, unconditioned stimulus, conditioned stimulus, conditioned response
- Operant conditioning—rewards, punishments, reinforcement schedules
- Examples should clearly demonstrate the processes

Page: 36–37

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Classical Conditioning

Topic: Operant Conditioning

130. Describe the cognitive approach to psychopathology. What are the three main goals in cognitive therapy? What are the limitations of cognitive theories?

Students' answers may vary. Key terms and concepts that may be included in student responses:

- Cognitions—thoughts or beliefs that shape our behaviors and the emotions we experience
- Causal attributions—the reasons we attribute to why events happen that can impact our behaviors
- Global assumptions—the positive or negative broad beliefs we have about ourselves, our relationships, and the world
- Dysfunctional global assumptions—the reason behind maladaptive behaviors as proposed by Beck and Ellis
- Cognitive-behavioral therapy (CBT)—combination of behavioral and cognitive therapies
- Goals—help clients identify irrational thoughts, consider alternative ways of thinking, face fears, learn to cope
- Limitations—difficulty proving that maladaptive cognitions precede and cause disorders, rather than being the symptoms or consequences of the disorders

Page: 39–41

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the cognitive approach to abnormal psychology.

Learning Objective: Assess the theories of the cognitive perspective and identify treatments.

Topic: Cognitive Behavioral Therapy

Topic: Cognitive Perspective

131. Describe Freud's psychosexual stages of development.

Students' answers may vary. Key terms and concepts that may be included in student responses:

- Oral stage—first 18 months, stimulation of the mouth area; features of oral character
- Anal stage—18 months to 3 years, focus of gratification is the anus; features of anal personality
- Phallic stage—3 to 6 years, Oedipus/Electra complex, penis envy, absence of castration anxiety in girls leads to lack of motivation to develop a super ego; problems associated with unsuccessful resolution of phallic stage
- Latency stage—libidinal drives are quelled, more same-sex interaction
- Genital stage—12 and older years, sexual interests turn to heterosexual relationships

Page: 42–43

APA Outcome: 1.1 Describe key concepts, principles, and overarching themes in psychology.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the psychological approach to abnormal psychology.

Topic: Freud

132. What must therapists bear in mind to ensure that treatment does not clash with the values and norms of their client's culture? Must a therapist come from the same culture as the client to fully understand the client?

Students answers' may vary. Key terms and concepts that may be included in student responses:

- Most psychotherapies are focused on the individual, but many cultures focus on the collective or group rather than the individual.
- Most psychotherapies value the expression of emotions and the disclosure of personal concerns, but some cultures value emotional restraint.
- Many psychotherapies expect clients to take the initiative in communicating their concerns and desires, but some cultural norms dictate deference to people in authority.
- Socioeconomic class and cultural differences between the client and therapist can create tensions.
- Ethnic matching is not an important predictor of the effectiveness of therapy; cultural sensitivity can probably be acquired through training and experience.

Page: 49-53

APA Outcome: 2.5 Incorporate sociocultural factors in scientific inquiry.

Bloom's: Understand

Difficulty: Moderate

Learning Objective: Analyze the sociocultural approach to abnormal psychology.

Learning Objective: Assess the theories of the sociocultural perspective and identify treatments.

Topic: Multicultural Approach

Topic: Sociocultural Perspective
