 - To help the user cope with physical and emotional pain

ANSWER: a

POINTS: 1

REFERENCES: Why Do People Choose to Use Drugs or Alcohol?

10. Modern society is so infused with alcohol and drug use that we do not:
- encourage access to sources for those compounds.
 - need much help in finding a source for these compounds.
 - expect minimal legal sanctions against those who sell and distribute drugs.
 - punish persons for their involuntary addiction-based behaviors.

ANSWER: b

POINTS: 1

REFERENCES: Why Do People Choose to Use Drugs or Alcohol?

11. The basic laws of behavioral psychology hold that the main motivating force for humans is the
- increase in comfort or decrease in discomfort.
 - pleasure principle.
 - disapproval of fringe social groups.
 - intrusive nature of sensory experiences deemed unacceptable to that person's social group.

ANSWER: a

POINTS: 1

REFERENCES: Why Do People Choose to Use Drugs or Alcohol?

12. Sociocultural influences on an individual's substance use behaviors
- are hardly relevant to the individual's choice of drugs of abuse.
 - push individuals towards alcohol but not drug abuse.
 - help to shape the individual's decision to engage in substance use.
 - are negative influences on the individual's life goals.

ANSWER: c

POINTS: 1

REFERENCES: Why Do People Choose to Use Drugs or Alcohol?

13. Which of the following statements is supported by research cited in your text?
- The term substance abuse has been clearly defined.
 - There is little agreement about how to define use, abuse, and addiction.
 - The limits of normal use have been defined, but abuse and addiction are still ill-defined.
 - The limits of both use and abuse have been clearly defined, but the term addiction is still poorly defined.

ANSWER: b

POINTS: 1

REFERENCES: The Continuum of Chemical Use

14. The person who has a substance abuse disorder will always have that disorder. Which of the following reactions is most appropriate, according to your text?
- Not true! Once the person stops using the substance the condition is no longer diagnosable.
 - True, but only if the person stops abusing the chemical before the age of 25, when s/he becomes an adult with full neurological capacity.
 - This issue has not been resolved yet.
 - Possibly, although this is only true for alcoholism and not illicit drugs.

ANSWER: c

POINTS: 1

REFERENCES: The Continuum of Chemical Use

15. Which of the following is one of the diagnostic criteria for the diagnosis of a substance use disorder, according to your text?
- a. Increased use over time
 - b. No avoidance of activities not centered on substance use
 - c. Enhancement of normal functioning
 - d. Adherence to religious dictates against substance use

ANSWER: a

POINTS: 1

REFERENCES: What Do We Mean When We Say That Somebody Is “Addicted” to a Chemical?

16. The withdrawal syndrome seen when a compound _____ characteristic of physical dependence on that compound.
- a. is discontinued is a
 - b. is discontinued is not a
 - c. is not used in excess is a
 - d. is used with decreasing frequency is not a

ANSWER: a

POINTS: 1

REFERENCES: Definitions of Terms Used in This Text

17. Tolerance to a compound is seen when
- a. the individual cannot predict in advance how much of that compound will be used.
 - b. the compound induces a state of well-being when used.
 - c. the individual is motivated to avoid compounds similar to that usually abused.
 - d. the individual must use more of a compound to achieve the effects once achieved at a lower dose.
