## The Accounting Information System

### ASSIGNMENT CLASSIFICATION TABLE (BY TOPIC)

Topics	Questions	Brief Exercises	Exercises	Problems
1. Transaction identification.	1, 2, 3, 5, 6, 7, 8	1, 2	1, 2, 3, 4, 17	1
2. Nominal accounts.	4, 7			
3. Trial balance.	6, 10		2, 3, 4	1, 2, 7, 8
4. Adjusting entries.	8, 11, 13, 14	3, 4, 5, 6, 7, 8, 9, 10	5, 6, 7, 8, 9, 10, 20	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 12
5. Financial statements.			11, 12, 15, 22, 23	1, 2, 4, 6
6. Closing.	12	11	13, 14, 16	1, 4, 9, 10, 12
7. Inventory and cost of goods sold.	9		14, 15	
8. Comprehensive accounting cycle.				1, 2, 6, 12
*9. Cash vs. Accrual Basis.	15, 16, 17	12	18, 19	11
*10. Reversing entries.	18	13	20	
*11. Worksheet.	19		21, 22, 23	12

\*These topics are dealt with in an Appendix to the Chapter.

## ASSIGNMENT CLASSIFICATION TABLE (BY LEARNING OBJECTIVE)

Learning Objectives	Brief Exercises	Exercises	Problems
1. Understand basic accounting terminology.			
2. Explain double-entry rules.			
3. Identify steps in accounting cycle.			
4. Record transactions in journals, post to ledger accounts, and prepare a trial balance.	1, 2, 3, 4, 5, 6, 7	1, 2, 3, 4, 17	1, 4, 9, 10
5. Explain the reasons for preparing adjusting entries.	3, 4, 5, 6, 7, 8, 9, 10	5, 6, 7, 8, 9, 10, 20	2, 3, 4, 5, 6, 7, 8, 9, 10, 12
6. Prepare financial statements from the adjusted trail balance.		11, 12, 15	1, 2, 4, 6, 7, 8, 9, 10, 12
7. Prepare closing entries.	11	13, 14, 16	1, 4, 9, 10, 12
*8. Differentiate the cash basis of accounting from the accrual basis of accounting.	12	18, 19	11
*9. Identify adjusting entries that may be reversed.	13	20	
*10. Prepare a 10-column worksheet.		21, 22, 23	12

\*These topics are dealt with in an Appendix to the Chapter.

# ANSWERS TO QUESTIONS

1. Examples are:
  - (a) Payment of an accounts payable.
  - (b) Collection of an accounts receivable from a customer.
  - (c) Transfer of an accounts payable to a note payable.
2. Transactions (a), (b), (d) are considered business transactions and are recorded in the accounting records because a change in assets, liabilities, or owners'/stockholders' equity has been effected as a result of a transfer of values from one party to another. Transactions (c) and (e) are not business transactions because a transfer of values has not resulted, nor can the event be considered financial in nature and capable of being expressed in terms of money.
3. Transaction (a): Accounts Receivable (debit), Service Revenue (credit).  
Transaction (b): Cash (debit), Accounts Receivable (credit).  
Transaction (c): Office Supplies (debit), Accounts Payable (credit).  
Transaction (d): Freight Out (debit), Cash (credit).
4. Revenue and expense accounts are referred to as temporary or nominal accounts because each period they are closed out to Income Summary in the closing process. Their balances are reduced to zero at the end of the accounting period; therefore, the term temporary or nominal is given to these accounts.
5. Andrea is not correct. The double-entry system means that for every debit amount there must be a credit amount and vice-versa. At least two accounts are affected. It does not mean that each transaction must be recorded twice.
6. Although it is not absolutely necessary that a trial balance be taken periodically, it is customary and desirable. The trial balance accomplishes two principal purposes:
  - (1) It tests the accuracy of the entries in that it proves that debits and credits of an equal amount are in the ledger.
  - (2) It provides a list of ledger accounts and their balances which may be used in preparing the financial statements and in supplying financial data about the concern.
7.
  - (a) Real account; balance sheet.
  - (b) Real account; balance sheet.
  - (c) Inventory is generally considered a real account appearing on the balance sheet. It has the elements of a nominal account when the periodic inventory system is used. It may appear on the income statement when the multiple-step format is used under a periodic inventory system.
  - (d) Real account; balance sheet.
  - (e) Real account; balance sheet.
  - (f) Nominal account; income statement.
  - (g) Nominal account; income statement.
  - (h) Real account; balance sheet.
8. At December 31, the three days' wages due to the employees represent a current liability. The related expense must be recorded in this period to properly reflect the expense incurred.
9.
  - (a) In a service company, revenues are service revenues and expenses are operating expenses. In a merchandising company, revenues are sales revenues and expenses consist of cost of goods sold plus operating expenses.
  - (b) The measurement process in a merchandising company consists of comparing the sales price of the merchandise inventory to the cost of goods sold and operating expenses.

### Questions Chapter 3 (Continued)

10. (a) No change.  
(b) Before closing, balances exist in these accounts; after closing, no balances exist.  
(c) Before closing, balances exist in these accounts; after closing, no balances exist.  
(d) Before closing, a balance exists in this account exclusive of any dividends or the net income or net loss for the period; after closing, the balance is increased or decreased by the amount of net income or net loss, and decreased by dividends declared.  
(e) No change.
11. Adjusting entries are prepared prior to the preparation of financial statements in order to bring the accounts up to date and are necessary (1) to achieve a proper recognition of revenues and expenses in measuring income and (2) to achieve an accurate presentation of assets, liabilities and stockholders' equity.
12. Closing entries are prepared to transfer the balances of nominal accounts to capital (retained earnings) after the adjusting entries have been recorded and the financial statements prepared. Closing entries are necessary to reduce the balances in nominal accounts to zero in order to prepare the accounts for the next period's transactions.
13.  $\text{Cost} - \text{Salvage Value} = \text{Depreciable Cost}$ :  $\$4,000 - \$0 = \$4,000$ .  $\text{Depreciable Cost} \div \text{Useful Life} = \text{Depreciation Expense For One Year}$   $\$4,000 \div 5 \text{ years} = \$800$  per year. The asset was used for 6 months (7/1 – 12/31), therefore 1/2-year of depreciation expense should be reported. Annual depreciation  $\times 6/12 =$  amount to be reported on 2012 income statement:  $\$800 \times 6/12 = \underline{\$400}$ .

14.

December 31	
Interest Receivable .....	10,000
Interest Revenue.....	10,000
(To record accrued interest revenue on loan)	

Accrued expenses result from the same causes as accrued revenues. In fact, an accrued expense on the books of one company is an accrued revenue to another company.

- \*15. Under the cash basis of accounting, revenue is recorded only when cash is received and expenses are recorded only when paid. Under the accrual basis of accounting, revenue is recognized when it is earned and expenses are recognized when incurred, without regard to the time of the receipt or payment of cash.
- A cash-basis balance sheet and income statement are incomplete and inaccurate in comparison to accrual-basis financial statements. The accrual basis matches effort (expenses) with accomplishment (revenues) in the income statement while the cash basis only presents cash receipts and cash disbursements. The accrual basis balance sheet contains receivables, payables, accruals, prepayments, and deferrals while a cash basis balance sheet shows none of these.
- \*16. Wages paid during the year will include the payment of any wages attributable to the prior year but unpaid at the end of the prior year. This amount is an expense of the prior year and not of the current year, and thus should be subtracted in determining wages expense. Similarly, wages paid during the year will not include any wages attributable to hours worked during the current year but not actually paid until the following year. This should be added in determining wages expense.
- \*17. Although similar to the strict cash basis, the modified cash basis of accounting requires that expenditures for capital items be charged against income over all the periods to be benefited. This is done through conventional accounting methods, such as depreciation and amortization. Under the strict cash basis, expenditures would be recognized as expenses in the period in which the corresponding cash disbursements are made.

### Questions Chapter 3 (Continued)

- \*18. Reversing entries are made at the beginning of the period to reverse accruals and some deferrals. Reversing entries are not required. They are made to simplify the recording of certain transactions that will occur later in the period. The same results will be attained whether or not reversing entries are recorded.
- \*19. Disagree. A worksheet is not a permanent accounting record and its use is not required in the accounting cycle. The worksheet is an informal device for accumulating and sorting information needed for the financial statements. Its use is optional in helping to prepare financial statements.

# TIME AND PURPOSE OF PROBLEMS

**Problem 3-1** (Time 25–35 minutes)

**Purpose**—to provide an opportunity for the student to post daily transactions to a “T” account ledger, take a trial balance, prepare an income statement, a balance sheet and a statement of owners’ equity, close the ledger, and take a post-closing trial balance. The problem deals with routine transactions of a professional service firm and provides a good integration of the accounting process.

**Problem 3-2** (Time 35–40 minutes)

**Purpose**—to provide an opportunity for the student to prepare adjusting entries, and prepare financial statements (income statement, balance sheet, and statement of retained earnings). The student also is asked to analyze two transactions to find missing amounts.

**Problem 3-3** (Time 25–30 minutes)

**Purpose**—to provide an opportunity for the student to prepare adjusting entries. The adjusting entries are fairly complex in nature.

**Problem 3-4** (Time 40–50 minutes)

**Purpose**—to provide an opportunity for the student to prepare adjusting entries and an adjusted trial balance and then prepare an income statement, a retained earnings statement, and a balance sheet. In addition, closing entries must be made and a post-closing trial balance prepared.

**Problem 3-5** (Time 15–20 minutes)

**Purpose**—to provide the student with an opportunity to determine what adjusting entries need to be made to specific accounts listed in a partial trial balance. The student is also required to determine the amounts of certain revenue and expense items to be reported in the income statement.

**Problem 3-6** (Time 25–35 minutes)

**Purpose**—to provide the student with an opportunity to prepare year-end adjusting entries from a trial balance and related information presented. The problem also requires the student to prepare an income statement, a balance sheet, and a statement of owners’ equity. The problem covers the basics of the end-of-period adjusting process.

**Problem 3-7** (Time 25–35 minutes)

**Purpose**—to provide an opportunity for the student to figure out the year-end adjusting entries that were made from a trial balance and an adjusted trial balance. The student is also required to prepare an income statement, a statement of retained earnings, and a balance sheet. In addition, the student needs to answer a number of questions related to specific accounts.

**Problem 3-8** (Time 25–35 minutes)

**Purpose**—to provide an opportunity for the student to figure out the year-end adjusting entries that were made from a trial balance and an adjusted trial balance. The student is also required to prepare an income statement, a statement of retained earnings, and a balance sheet. In addition, the student needs to answer a number of questions related to specific accounts.

**Problem 3-9** (Time 30–40 minutes)

**Purpose**—to provide an opportunity for the student to prepare adjusting, and closing entries. This problem presents basic adjustments including a number of accruals and deferrals. It provides the student with an integrated flow of the year-end accounting process.

**Problem 3-10** (Time 30–35 minutes)

**Purpose**—to provide an opportunity for the student to prepare adjusting and closing entries from a trial balance and related information. The student is also required to post the entries to “T” accounts.

## Time and Purpose of Problems (Continued)

**\*Problem 3-11** (Time 35–40 minutes)

Purpose—to provide an opportunity for the student to prepare and compare (a) cash basis and accrual basis income statements, (b) cash basis and accrual basis balance sheets, and (c) to discuss the weaknesses of cash basis accounting.

**\*Problem 3-12** (Time 40–50 minutes)

Purpose—to provide an opportunity for the student to complete a worksheet and then prepare a classified balance sheet. In addition, adjusting and closing entries must be made and a post-closing trial balance prepared.

**\*PROBLEM 3-11 (Continued)**

- (c)
1. The \$23,400 in receivables from customers is an asset and a future cash flow resulting from sales that is ignored. The cash basis understates the amount of revenues and inflow of assets in January from the sale of computers and printers by \$23,400.
  2. The cost of computers and printers sold in January is overstated by \$23,000. The unsold computers and printers are an asset of \$23,000 in the form of inventory.
  3. The cash basis ignores \$3,000 of the salaries that have been earned by the employees in January and will be paid in February.
  4. Rent expense on the cash basis is overstated by \$4,000 under the cash basis. This prepayment is an asset in the form of two months' future right to the use of office, showroom, and repair space and should appear on the balance sheet.
  5. Other operating expenses on a cash basis are understated by \$2,000 as is the liability for the unpaid portion of these expenses incurred in January.

## FINANCIAL REPORTING PROBLEM

- (a) June 30, 2009 total assets: \$134,833 million.  
June 30, 2008 total assets: \$143,992 million.
- (b) June 30, 2009 cash and cash equivalents: \$4,781 million.
- (c) 2009 research and development costs: \$2,044 million.  
2008 research and development costs: \$2,212 million.
- (d) 2009 net sales: \$79,029 million.  
2008 net sales: \$81,748 million.
- (e) An adjusting entry for deferrals is necessary when the receipt/disbursement precedes the recognition in the financial statements. Accounts such as prepaid insurance and prepaid rent may be included in the Prepaid Expenses and Other Current Assets (\$3,199 million at June 30, 2009). Both of these accounts would require an adjusting entry to recognize the proper amount of expense incurred during the period. In addition, depreciation expense is an adjusting entry related to a deferral.

An adjusting entry for an accrual is necessary when recognition in the financial statements precedes the cash receipt/disbursement, such as interest or taxes payable. Other adjusting entries probably made by P&G include interest revenue and expense and interest receivable and interest payable. P&G reports \$8,601 million of Accrued and Other Liabilities at June 30, 2009.

- (f) 2009 Depreciation and amortization expense: \$3,082 million  
2008 Depreciation and amortization expense: \$3,166 million  
2007 Depreciation and amortization expense: \$3,130 million

(From the Statement of Cash Flows)

## COMPARATIVE ANALYSIS CASE

- (a) The Coca-Cola Company percentage increase is computed as follows:

Total assets (December 31, 2009) .....	\$48,671
Total assets (December 31, 2008) .....	<u>\$40,519</u>
Difference .....	<u>\$ 8,152</u>

$$\$8,152 \div \$40,519 = \underline{\underline{\$20.1\%}}$$

PepsiCo, Inc.'s percentage increase is computed as follows:

Total assets (December 29, 2009) .....	\$39,848
Total assets (December 30, 2008) .....	<u>\$35,994</u>
Difference .....	<u>\$ 3,854</u>

$$\$3,854 \div \$35,994 = \underline{\underline{\$10.7\%}}$$

Coca-Cola Company had the larger increase.

- (b)

	5-Year Growth Rate	
	The Coca-Cola Company	PepsiCo, Inc.
Net sales	7.9%	7.4%
Income from continuing operations	8.1%	7.9%

- (c) The Coca-Cola Company had depreciation and amortization expense of \$1,236 million; PepsiCo, Inc. had depreciation and amortization expense of \$1,635 million.

## COMPARATIVE ANALYSIS CASE (Continued)

PepsiCo has substantially more property, plant, and equipment than does Coca-Cola. PepsiCo is engaged in three different types of businesses: soft drinks, snack-food, and juices. As a result, it has more tangible fixed assets. While Coca-Cola has substantially more intangible assets, it is not sufficient enough to offset the property, plant, and equipment. Amortizable intangible assets for Coke and Pepsi increase the amount of amortization expense recorded in income. The amount of property, plant, and equipment and amortizable intangible assets reported for these two companies is as follows:

	<u>The Coca-Cola Company</u>	<u>PepsiCo, Inc.</u>
Property, plant, and equipment (net)	\$ 9,561,000,000	\$12,671,000,000
Amortizable intangible assets (net)	<u>2,421,000,000</u>	<u>841,000,000</u>
	\$11,982,000,000	\$13,512,000,000

- (b)** Kellogg experienced a slight slowing in sales (slight decline) in the current year which followed strong growth in the previous year. The gross-profit percentage increased slightly after a drop in the prior year. Its growth in operating profit and cash flows, compared to prior years, suggest it faces a challenging period and might be starting recover. This may bode well for the strength and flexibility of its business model.

Without recording the adjusting entries, Amato's income is overstated. In addition, without the adjustments, Amato's current liabilities and current assets are misstated, which could affect evaluation of Amato's liquidity.

### Principles

The tradeoffs are between the *timeliness* of the reports, which contributes to relevance, and verifiability, the lack of which detracts from faithful representation. That is, by preparing reports more frequently, the company provides more timely information, which can make a difference to a statement reader who needs to make a decision. However, preparing statements more frequently requires more subjective estimates, which reduces faithful representation.

**(a) The three essential characteristics of assets.**

**Search String: asset and characteristics.**

**CON6, Par26. An asset has three essential characteristics: (a) it embodies a probable future benefit that involves a capacity, singly or in combination with other assets, to contribute directly or indirectly to future net cash inflows, (b) a particular entity can obtain the benefit and control others' access to it, and (c) the transaction or other event giving rise to the entity's right to or control of the benefit has already occurred.**

**(b) Three essential characteristics of liabilities.**

**Search String: liability and characteristic.**

**CON6, Par36. A liability has three essential characteristics: (a) it embodies a present duty or responsibility to one or more other entities that entails settlement by probable future transfer or use of assets at a specified or determinable date, on occurrence of a specified event, or on demand, (b) the duty or responsibility obligates a particular entity, leaving it little or no discretion to avoid the future sacrifice, and (c) the transaction or other event obligating the entity has already happened.**

**(c) Uncertainty, and its effects on financial statements.**

**Search Strings: "uncertainty", effect of uncertainty.**

**CON6, Par44. Uncertainty about economic and business activities and results is pervasive, and it often clouds whether a particular item qualifies as an asset or a liability of a particular entity at the time the definitions are applied. The presence or absence of future economic benefit that can be obtained and controlled by the entity or of the entity's legal, equitable, or constructive obligation to sacrifice assets in the future can often be discerned reliably only with hindsight. As a result, some items that with hindsight actually qualified as assets or liabilities of the entity under the definitions may, as a practical matter, have been recognized as expenses, losses, revenues, or gains or**

remained unrecognized in its financial statements because of uncertainty about whether they qualified as assets or liabilities of the entity or because of recognition and measurement considerations stemming from uncertainty at the time of assessment. Conversely, some items that with hindsight did not qualify under the definitions may have been included as assets or liabilities because of judgments made in the face of uncertainty at the time of assessment.

**CON6, Par45.** An effect of uncertainty is to increase the costs of financial reporting in general and the costs of recognition and measurement in particular. Some items that qualify as assets or liabilities under the definitions may therefore be recognized as expenses, losses, revenues, or gains or remain unrecognized as a result of cost and benefit analyses indicating that their formal incorporation in financial statements is not useful enough to justify the time and effort needed to do it. It may be possible, for example, to make the information more reliable in the face of uncertainty by exerting greater effort or by spending more money, but it also may not be worth the added cost.

Note to instructors: The FASB codification does not contain the Concepts Statements. However, the Concepts Statements can be accessed at another link on the FASB website.

### (d) The difference between realization and recognition

Search String: realization, recognition.

**CON6, Par143.** Realization in the most precise sense means the process of converting noncash resources and rights into money and is most precisely used in accounting and financial reporting to refer to sales of assets for cash or claims to cash. The related terms realized and unrealized therefore identify revenues or gains or losses on assets sold and unsold, respectively. Those are the meanings of realization and related terms in the Board's conceptual framework. Recognition is the process of formally recording or incorporating an item in the financial statements of an entity. Thus, an asset, liability, revenue, expense, gain, or loss may be recognized (recorded) or unrecognized (unrecorded). Realization and recognition are not used as synonyms, as they sometimes are in accounting and financial literature.

### Explanation

After the financial statements are prepared, Nalezny must prepare the closing entries and post the journal entries to the general ledger. Then, a post-closing trial balance is prepared. Some companies may also prepare and post reversing entries.

### IFRS3-1

The date of transition is the beginning of the earliest period for which full comparative IFRS information is provided. The date of reporting is the closing balance sheet date for the first IFRS financial statements.

### IFRS3-2

When countries accept IFRS for use as accepted accounting policies, companies need guidance to ensure that their first IFRS financial statements contain high quality information. Specifically, *IFRS 1* requires that information in a company's first IFRS statements (1) be transparent, (2) provide a suitable starting point, and (3) have a cost that does not exceed the benefits.

### IFRS3-3

A company follows these steps:

1. Identify the timing of its first IFRS statements.
2. Prepare an opening balance sheet at the date of transition to IFRS.
3. Select accounting principles that comply with IFRS, and apply these principles retrospectively.
4. Make extensive disclosures to explain the transition to IFRS

### IFRS3-4

The date of the opening balance sheet is January 1, 2012. The IFRS financial statements will include years ended December 31, 2013 and 2012.

### IFRS3-5

#### (a) Assets

- 53 The future economic benefit embodied in an asset is the potential to contribute, directly or indirectly, to the flow of cash and cash equivalents to the entity. The potential may be a productive one that is part of the operating activities of the entity. It may also take the form of convertibility into cash or cash equivalents or a capability to reduce cash outflows, such as when an alternative manufacturing process lowers the costs of production.

- 54** An entity usually employs its assets to produce goods or services capable of satisfying the wants or needs of customers; because these goods or services can satisfy these wants or needs, customers are prepared to pay for them and hence contribute to the cash flow of the entity. Cash itself renders a service to the entity because of its command over other resources.
- 55** The future economic benefits embodied in an asset may flow to the entity in a number of ways. For example, an asset may be:
- a.** used singly or in combination with other assets in the production of goods or services to be sold by the entity;
  - b.** exchanged for other assets;
  - c.** used to settle a liability; or
  - d.** distributed to the owners of the entity.

**(b) Liabilities**

- 60** An essential characteristic of a liability is that the entity has a present obligation. An obligation is a duty or responsibility to act or perform in a certain way. Obligations may be legally enforceable as a consequence of a binding contract or statutory requirement. This is normally the case, for example, with amounts payable for goods and services received. Obligations also arise, however, from normal business practice, custom and a desire to maintain good business relations or act in an equitable manner. If, for example, an entity decides as a matter of policy to rectify faults in its products even when these become apparent after the warranty period has expired, the amounts that are expected to be expended in respect of goods already sold are liabilities.
- 61** A distinction needs to be drawn between a present obligation and a future commitment. A decision by the management of an entity to acquire assets in the future does not, of itself, give rise to a present obligation. An obligation normally arises only when the asset is delivered or the entity enters into an irrevocable agreement to acquire the asset. In the latter case, the irrevocable nature of the agreement means that the economic consequences of failing to honour the obligation, for example, because of the existence of a substantial penalty, leave the entity with little, if any, discretion to avoid the outflow of resources to another party.

## **IFRS3-5 (continued)**

**62 The settlement of a present obligation usually involves the entity giving up resources embodying economic benefits in order to satisfy the claim of the other party. Settlement of a present obligation may occur in a number of ways, for example, by:**

- a. payment of cash;**
- b. transfer of other assets;**
- c. provision of services;**
- d. replacement of that obligation with another obligation; or**
- e. conversion of the obligation to equity.**

### **(c) Accrual basis**

**22 In order to meet their objectives, financial statements are prepared on the accrual basis of accounting. Under this basis, the effects of transactions and other events are recognised when they occur (and not as cash or its equivalent is received or paid) and they are recorded in the accounting records and reported in the financial statements of the periods to which they relate. Financial statements prepared on the accrual basis inform users not only of past transactions involving the payment and receipt of cash but also of obligations to pay cash in the future and of resources that represent cash to be received in the future. Hence, they provide the type of information about past transactions and other events that is most useful to users in making economic decisions.**

## **IFRS3-6**

- (a) April 3, 2010 total assets: £7,153.2 million.  
March 28, 2009 total assets: £7,258.1 million.**
- (b) April 3, 2010 cash and cash equivalents: £405.8 million.**
- (c) 2010 selling and marketing expense: £2,216.6 million.  
2009 selling and marketing expense: £2,074.4 million.**
- (d) 2010 revenue: £9,536.6 million.  
2009 revenue: £9,062.1 million.**

**IFRS3-6 (Continued)**

- (e) An adjusting entry for deferrals is necessary when the receipt/disbursement precedes the recognition in the financial statements. Accounts such as prepaid pension contributions and prepaid leasehold premiums are included in the Trade and other receivables section (£281.4 million at April 3, 2010). Both of these accounts would require an adjusting entry to recognize the proper amount of expense incurred during the period. In addition, depreciation expense is an adjusting entry related to a deferral.

An adjusting entry for an accrual is necessary when recognition in the financial statements precedes the cash receipt/disbursement, such as interest or taxes payable. Other adjusting entries probably made by M&S include finance income and finance costs and bank and other interest receivable and interest payable.

- (f) 2010 Depreciation and amortization expense: £427.9 million  
2009 Depreciation and amortization expense: £409.0 million
