

Chapter 02

Worldwide Accounting Diversity

Multiple Choice Questions

1. What is the equivalent of the common stock account on a U.S. balance sheet on the balance sheet of a British company?
 - A. Capital redemption reserve
 - B. Share premium account
 - C. Own shares held
 - D. Called-up share capital

2. What does "harmonization" mean in the context of international accounting?
 - A. The process of combining the financial statements of foreign subsidiaries into the parent company's financial statements
 - B. The process of reducing accounting differences across countries
 - C. Disclosing the accounting methods used in preparing the financial statements
 - D. Assessing the exposure resulting from inadequate internal controls

3. It is generally believed that the 1997 financial crisis in East Asia was partly due to accounting factors in that part of the world. Which of the following accounting values was lacking in that part of the world and thereby contributed to the crisis?
- A. Professionalism
 - B. Statutory control
 - C. Uniformity
 - D. Transparency
4. Which of the following is NOT a problem caused by accounting diversity?
- A. Lack of qualified international auditors
 - B. Preparation of consolidated financial statements
 - C. Access to foreign capital markets
 - D. Comparability of financial statements
5. Differences in legal systems used in various countries have been cited as one reason for diversity in accounting practices. What are the major types of legal systems?
- A. Commercial law and accounting law
 - B. Rules and regulations
 - C. Written law and unwritten law
 - D. Common law and code law
6. The accounting standards in code law countries tend to be:
- A. very detailed.
 - B. formulated by organizations such as the FASB.
 - C. stated generally without much guidance on accounting procedures.
 - D. very conservative.

7. What is likely to be the source of accounting standards in common law countries?
- A. Tax law
 - B. Non-government entities such as the FASB
 - C. Federal and local legislatures
 - D. The International Accounting Standards Board
8. What is the likely result when accounting rules are left up to professional associations rather than being legislated by governmental bodies?
- A. Very general accounting rules are created, as in code law countries.
 - B. Very detailed rules for practice are created, as in common law countries.
 - C. Very general accounting rules are created, as in common law countries.
 - D. Very detailed rules for practice are created, as in code law countries.
9. Relative to accounting standards in countries such as Germany, whose accounting laws are only 47 pages long, accounting practice in the U.S. is often described as being subject to:
- A. standards overload.
 - B. standards minimization.
 - C. the optimal amount of accounting regulation.
 - D. ideal accounting standards.
10. In code law countries such as Germany, France, and Japan, tax law and accounting standards tend to be:
- A. unrelated.
 - B. very different.
 - C. general.
 - D. detail oriented.

11. If most of a country's business financing comes from families, banks, and the government, what should we expect in terms of information disclosure to the public?
- A. Relatively little disclosure because the public isn't a major factor
 - B. A great deal of disclosure because it will be the only way for interested parties to learn about the company
 - C. Complete openness of accounting records
 - D. No disclosure at all
12. In countries such as the U.S., there is great demand for public disclosure of accounting information. What is the reason for this?
- A. Corporate management isn't trustworthy.
 - B. Businesses rely heavily on financing through issuance of stock to the public.
 - C. The American populace is better able to read financial statements than people in other countries.
 - D. U.S. government officials are generally members of corporate boards of directors and can get all the information they require.
13. Historical cost is the primary basis for asset valuation under U.S. GAAP. Why is historical cost NOT as important in the accounting systems of Latin America as in the U.S.?
- A. Historical costs are too difficult to calculate in the currencies used in Central and South America.
 - B. The countries of Latin America have experienced very high rates of inflation, which would make historical costs meaningless to readers of financial statements.
 - C. There is very little foreign direct investment in the countries of Latin America, so few assets need to be accounted for.
 - D. In Latin America, asset prices are very stable, making historical costs equal to replacement costs, so it doesn't matter which valuation basis is used.

14. In the United States, conformity between presentation of the financial statements and the tax statements is required only for:
- A. goodwill.
 - B. depreciation.
 - C. gains or losses on securities.
 - D. the use of the LIFO inventory cost flow assumption.
15. In some countries, financial accounting and tax accounting are so closely related that there is very little need to account for deferred income taxes. Which of the following countries has a financial accounting system that is most different from its tax laws?
- A. United States of America
 - B. Japan
 - C. Germany
 - D. France
16. In the Nobes classification of accounting systems, micro-based accounting systems are oriented toward:
- A. government economics.
 - B. business practices.
 - C. tax laws.
 - D. code law.
17. According to the research of Christopher Nobes, the most relevant factor in determining the purpose of financial reporting is:
- A. the financing system of the country.
 - B. religious differences across countries.
 - C. the population of the country.
 - D. the strength of the country's accounting profession.

18. According to the research of Christopher Nobes, what is the primary determinant of the accounting systems in developing countries?
- A. The nature of their financing system
 - B. The accounting system of countries that dominate their culture
 - C. The size of their capital market
 - D. The strength of their tax code
19. The "Fair Presentation/Full Disclosure Model" is a classification scheme used by:
- A. Germany.
 - B. Japan.
 - C. the United States and the United Kingdom.
 - D. Brazil.
20. The extent to which hierarchy and unequal authority distribution in institutions and organizations are accepted within a culture is referred to as:
- A. uncertainty avoidance.
 - B. masculinity.
 - C. individualism.
 - D. power distance.
21. A cultural preference for a loosely knit social fabric rather than a tightly knit social fabric is referred to as:
- A. uncertainty avoidance.
 - B. masculinity.
 - C. individualism.
 - D. power distance.

22. A cultural emphasis on values of performance and achievement rather than values of relationships, caring, and nurturing is referred to as:

- A. uncertainty avoidance.
- B. masculinity.
- C. individualism.
- D. power distance.

23. What term is used to refer to a cultural aversion to ambiguous situations?

- A. Uncertainty avoidance
- B. Masculinity
- C. Power distance
- D. Individualism

24. A cultural preference for accounting systems that rely on compliance with legal requirements is called:

- A. professionalism.
- B. uniformity.
- C. statutory control.
- D. optimism.

25. Countries such as the U.S. tend to value self-regulation of accounting. What term is used to define this subculture?

- A. Uniformity
- B. Flexibility
- C. Conservatism
- D. Professionalism

26. What does "transparency" mean in accounting?

- A. An emphasis on confidentiality
- B. Restricted disclosure of accounting information
- C. Flexibility in the application of accounting standards
- D. Openness of accounting information

27. What term is used to describe accounting standards that encourage risk-taking in financial reporting?

- A. Optimism
- B. Conservatism
- C. Professionalism
- D. Transparency

28. In Gray's framework for accounting system development, which of the following countries tends to have a relatively high degree of transparency in their companies' financial statements?

- A. Germany
- B. Switzerland
- C. United Kingdom
- D. Saudi Arabia

29. In Gray's framework for accounting system development, which of the following countries tends to show a relatively high preference for conservative accounting standards?

- A. Norway
- B. United Kingdom
- C. United States of America
- D. Japan

30. In Gray's framework for accounting system development, optimism is a value of accounting standards that would most likely be found in ____.
- A. Japan
 - B. Australia
 - C. Mexico
 - D. Brazil
31. In Gray's framework for accounting system development, the cultural dimensions of individualism, power distance, uncertainty avoidance, and masculinity directly affect:
- A. accounting systems.
 - B. accounting values.
 - C. external influences.
 - D. ecological influences.
32. Individualism, power distance, uncertainty avoidance, and masculinity are examples of:
- A. accounting values.
 - B. ecological factors.
 - C. cultural dimensions.
 - D. external forces.
33. The concepts of professionalism, uniformity, conservatism, and secrecy are classified in Gray's framework for accounting system development as:
- A. accounting values.
 - B. accounting systems.
 - C. institutional consequences.
 - D. cultural dimensions.

34. According to Gray's framework for accounting system development, which of the following is directly affected by ecological influences, such as geography, demography, and technology?
- A. Accounting values
 - B. Accounting systems
 - C. Institutional consequences
 - D. Cultural dimensions
35. According to Gray's framework for accounting system development, the counterpart to the accounting value of "secrecy" is:
- A. professionalism.
 - B. transparency.
 - C. optimism.
 - D. flexibility.
36. In their 1993 paper, Douppnik and Salter found that countries tended to cluster in terms of the similarities or differences of their accounting systems. These researchers attribute the large cluster around United Kingdom to:
- A. the superiority of the Anglo accounting model.
 - B. the predominant influence of Great Britain in the world economy.
 - C. the colonial influence of Great Britain on accounting development.
 - D. the fact that more of the world's people speak English than any other language.
37. The 1993 study by Douppnik and Salter found that a cluster of Latin American countries indicated that the similarity of their accounting systems was related to:
- A. a common currency.
 - B. the importance of inflation.
 - C. the colonial influence of Spain.
 - D. the colonial influence of the United States of America.

38. In some countries, financial institutions operate under Shariah, which also gives guidance about accounting practice in these institutions. Shariah is the:
- A. financial accounting standards board in Saudi Arabia.
 - B. law governing human conduct that is derived from the Koran.
 - C. codification of banking regulations in the European Union.
 - D. political system used in South American countries.
39. The term "Class A Accounting" as it is used by the researcher Christopher Nobes refers to:
- A. conservative accounting systems.
 - B. the most efficient accounting systems.
 - C. accounting systems that primarily serve external shareholders.
 - D. accounting systems developed primarily for creditors and taxing authorities.
40. The term "Class B Accounting" as it is used by the researcher Christopher Nobes refers to:
- A. less preferred accounting systems.
 - B. less efficient accounting systems.
 - C. accounting systems that primarily serve external shareholders.
 - D. accounting systems that were developed primarily for creditors and taxing authorities.
41. Which financial statement is provided by virtually all corporations worldwide?
- A. Statement of Cash Flows
 - B. Statement of Changes in Financial Position
 - C. Balance Sheet
 - D. Statement of Changes in Non-current Assets

42. Which of the following financial statements is NOT universally included in annual reports?

- A. Balance sheet
- B. Statement of cash flows
- C. Income statement
- D. All of the above statements are included in annual reports worldwide.

43. International accounting diversity can be found in terms of:

- A. the terminology used in the financial statements.
- B. the amount of information disclosed in the financial statements.
- C. the order of items in the financial statements.
- D. All of the above evidence of accounting diversity.

44. What term is used to refer to the decision about whether to report an item in the financial statements?

- A. Capitalization
- B. Recognition
- C. Realization
- D. Conservatism

45. What method of fixed asset valuation would most likely be used in countries that regularly experience high rates of inflation?

- A. Historical cost at subsequent balance sheet dates
- B. Net realizable value at subsequent balance sheet dates
- C. Fair value
- D. Net present value at subsequent balance sheet dates

46. Under U.S. GAAP, fixed assets are generally reported on the balance sheet at their:
- A. historical cost.
 - B. net realizable value.
 - C. fair value.
 - D. market value.
47. Which of the following bases for fixed asset valuation was being used by Mexico until 2008?
- A. Historical cost
 - B. Historical cost later restated in terms of GPP
 - C. Historical replacement cost
 - D. Net realizable value
48. The methods allowed by the IFRS for valuing property, plant, and equipment are:
- A. historic cost and general purchasing power.
 - B. historic cost and fair value.
 - C. fair value and general purchasing power.
 - D. fair value and inflation-adjustment.
49. In terms of level of detail provided in the individual financial statements, the U.S. tends to:
- A. emphasize more line items on the face of the financial statements.
 - B. rely less on footnote disclosure.
 - C. condense the amount of line items and supplement with more footnote detail.
 - D. use footnotes only when absolutely required by GAAP.

50. Which of the following is found in a Mexican income statement in the "Comprehensive Financing Result" section?
- A. Non-controlling interest net income
 - B. Purchasing power gain or loss during inflationary periods
 - C. Income taxes
 - D. Equity in income of associates
51. Assets are commonly shown in order of their liquidity, or in reverse order of their liquidity. What is liquidity?
- A. Liquidity refers to how easily the assets are converted to cash.
 - B. Liquidity means that assets are inflation-adjusted.
 - C. Liquidity refers to whether the asset is depreciable or not.
 - D. Liquidity means that the assets are closely matched to specific liabilities.
52. Which of the following statements is true about the comparability of financial statement of the United States and the United Kingdom?
- A. The result of Latin American colonialism is the large number of countries with the United Kingdom's influence on their accounting practices.
 - B. The financial statements of companies in the United States and the United Kingdom are comparable as they are prepared after adjusting inflation, which is a critical factor affecting accounting practice.
 - C. The basic principle followed by both countries in preparing financial statements is government economics and government tax and legal framework.
 - D. The accounting practices of both the countries are oriented toward the decision needs of a large number of investors and creditors.

53. According to Gray's framework which is an extension of Hofstede's model of cultural pattern, which of the following is true about accounting system development?
- A. Accounting system development is mainly influenced by a country's constitutional framework.
 - B. Countries following limited disclosures adhere less strictly to the notion of conservatism in the measurement of assets and liabilities.
 - C. Accounting system development is influenced by a less conservative approach resulting in the development of short-term oriented accounting practices.
 - D. The external factors have a direct influence on the development of institutional framework leading to the development of accounting systems.
54. Which of the following is the primary purpose of preparing a statement of added value?
- A. To show the value added to products while at production
 - B. To show the distribution of added value by the company among shareholders
 - C. To calculate the net taxable income of the company
 - D. To show the costs in addition to gross payroll that the company incurs related to its labor force
55. Gray argues that national cultural values affect accounting values. If Country X ranks low on uncertainty avoidance, which of the following statements would be true?
- A. The country would rank high on the accounting values of uniformity.
 - B. The country would rank high on the accounting values of secrecy.
 - C. The country would rank low on the accounting values of professionalism.
 - D. The country would rank low on the accounting values of conservatism.

Chapter 02 Worldwide Accounting Diversity Answer Key

Multiple Choice Questions

1. What is the equivalent of the common stock account on a U.S. balance sheet on the balance sheet of a British company?

A. Capital redemption reserve
B. Share premium account
C. Own shares held
D. Called-up share capital

Learning Objective: 02-01 Provide evidence of the diversity that exists in accounting internationally.

Level of Difficulty: 2 Medium

2. What does "harmonization" mean in the context of international accounting?

A. The process of combining the financial statements of foreign subsidiaries into the parent company's financial statements
B. The process of reducing accounting differences across countries
C. Disclosing the accounting methods used in preparing the financial statements
D. Assessing the exposure resulting from inadequate internal controls

Learning Objective: 02-02 Explain the problems caused by accounting diversity.

Level of Difficulty: 2 Medium

3. It is generally believed that the 1997 financial crisis in East Asia was partly due to accounting factors in that part of the world. Which of the following accounting values was lacking in that part of the world and thereby contributed to the crisis?

A. Professionalism
B. Statutory control
C. Uniformity
D. Transparency

Learning Objective: 02-02 Explain the problems caused by accounting diversity.

Level of Difficulty: 3 Hard

4. Which of the following is NOT a problem caused by accounting diversity?

A. Lack of qualified international auditors
B. Preparation of consolidated financial statements
C. Access to foreign capital markets
D. Comparability of financial statements

Learning Objective: 02-02 Explain the problems caused by accounting diversity.

Level of Difficulty: 2 Medium

5. Differences in legal systems used in various countries have been cited as one reason for diversity in accounting practices. What are the major types of legal systems?

A. Commercial law and accounting law
B. Rules and regulations
C. Written law and unwritten law
D. Common law and code law

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.

Level of Difficulty: 1 Easy

6. The accounting standards in code law countries tend to be:
- A. very detailed.
 - B. formulated by organizations such as the FASB.
 - C. stated generally without much guidance on accounting procedures.
 - D. very conservative.

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium

7. What is likely to be the source of accounting standards in common law countries?
- A. Tax law
 - B. Non-government entities such as the FASB
 - C. Federal and local legislatures
 - D. The International Accounting Standards Board

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium

8. What is the likely result when accounting rules are left up to professional associations rather than being legislated by governmental bodies?
- A. Very general accounting rules are created, as in code law countries.
 - B. Very detailed rules for practice are created, as in common law countries.
 - C. Very general accounting rules are created, as in common law countries.
 - D. Very detailed rules for practice are created, as in code law countries.

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 3 Hard

9. Relative to accounting standards in countries such as Germany, whose accounting laws are only 47 pages long, accounting practice in the U.S. is often described as being subject to:

A. standards overload.
B. standards minimization.
C. the optimal amount of accounting regulation.
D. ideal accounting standards.

*Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium*

10. In code law countries such as Germany, France, and Japan, tax law and accounting standards tend to be:

A. unrelated.
B. very different.
C. general.
D. detail oriented.

*Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium*

11. If most of a country's business financing comes from families, banks, and the government, what should we expect in terms of information disclosure to the public?

A. Relatively little disclosure because the public isn't a major factor
B. A great deal of disclosure because it will be the only way for interested parties to learn about the company
C. Complete openness of accounting records
D. No disclosure at all

*Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium*

12. In countries such as the U.S., there is great demand for public disclosure of accounting information. What is the reason for this?
- A. Corporate management isn't trustworthy.
 - B.** Businesses rely heavily on financing through issuance of stock to the public.
 - C. The American populace is better able to read financial statements than people in other countries.
 - D. U.S. government officials are generally members of corporate boards of directors and can get all the information they require.

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.

Level of Difficulty: 2 Medium

13. Historical cost is the primary basis for asset valuation under U.S. GAAP. Why is historical cost NOT as important in the accounting systems of Latin America as in the U.S.?
- A. Historical costs are too difficult to calculate in the currencies used in Central and South America.
 - B.** The countries of Latin America have experienced very high rates of inflation, which would make historical costs meaningless to readers of financial statements.
 - C. There is very little foreign direct investment in the countries of Latin America, so few assets need to be accounted for.
 - D. In Latin America, asset prices are very stable, making historical costs equal to replacement costs, so it doesn't matter which valuation basis is used.

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.

Level of Difficulty: 2 Medium

14. In the United States, conformity between presentation of the financial statements and the tax statements is required only for:
- A. goodwill.
 - B. depreciation.
 - C. gains or losses on securities.
 - D. the use of the LIFO inventory cost flow assumption.

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium

15. In some countries, financial accounting and tax accounting are so closely related that there is very little need to account for deferred income taxes. Which of the following countries has a financial accounting system that is most different from its tax laws?
- A. United States of America
 - B. Japan
 - C. Germany
 - D. France

Learning Objective: 02-03 Describe the major environmental factors that influence national accounting systems and lead to accounting diversity.
Level of Difficulty: 2 Medium

16. In the Nobes classification of accounting systems, micro-based accounting systems are oriented toward:
- A. government economics.
 - B. business practices.
 - C. tax laws.
 - D. code law.

Learning Objective: 02-04 Describe a judgmental classification of countries by financial reporting system.
Level of Difficulty: 3 Hard

17. According to the research of Christopher Nobes, the most relevant factor in determining the purpose of financial reporting is:

- A. the financing system of the country.
- B. religious differences across countries.
- C. the population of the country.
- D. the strength of the country's accounting profession.

Learning Objective: 02-04 Describe a judgmental classification of countries by financial reporting system.

Level of Difficulty: 2 Medium

18. According to the research of Christopher Nobes, what is the primary determinant of the accounting systems in developing countries?

- A. The nature of their financing system
- B. The accounting system of countries that dominate their culture
- C. The size of their capital market
- D. The strength of their tax code

Learning Objective: 02-04 Describe a judgmental classification of countries by financial reporting system.

Level of Difficulty: 2 Medium

19. The "Fair Presentation/Full Disclosure Model" is a classification scheme used by:

- A. Germany.
- B. Japan.
- C. the United States and the United Kingdom.
- D. Brazil.

Learning Objective: 02-04 Describe a judgmental classification of countries by financial reporting system.

Level of Difficulty: 2 Medium

20. The extent to which hierarchy and unequal authority distribution in institutions and organizations are accepted within a culture is referred to as:

- A. uncertainty avoidance.
- B. masculinity.
- C. individualism.
- D. power distance.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

21. A cultural preference for a loosely knit social fabric rather than a tightly knit social fabric is referred to as:

- A. uncertainty avoidance.
- B. masculinity.
- C. individualism.
- D. power distance.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

22. A cultural emphasis on values of performance and achievement rather than values of relationships, caring, and nurturing is referred to as:

- A. uncertainty avoidance.
- B. masculinity.
- C. individualism.
- D. power distance.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

23. What term is used to refer to a cultural aversion to ambiguous situations?

- A. Uncertainty avoidance
- B. Masculinity
- C. Power distance
- D. Individualism

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

24. A cultural preference for accounting systems that rely on compliance with legal requirements is called:

- A. professionalism.
- B. uniformity.
- C. statutory control.
- D. optimism.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

25. Countries such as the U.S. tend to value self-regulation of accounting. What term is used to define this subculture?

- A. Uniformity
- B. Flexibility
- C. Conservatism
- D. Professionalism

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

26. What does "transparency" mean in accounting?

- A. An emphasis on confidentiality
- B. Restricted disclosure of accounting information
- C. Flexibility in the application of accounting standards
- D. Openness of accounting information

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 1 Easy

27. What term is used to describe accounting standards that encourage risk-taking in financial reporting?

- A. Optimism
- B. Conservatism
- C. Professionalism
- D. Transparency

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

28. In Gray's framework for accounting system development, which of the following countries tends to have a relatively high degree of transparency in their companies' financial statements?

- A. Germany
- B. Switzerland
- C. United Kingdom
- D. Saudi Arabia

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 3 Hard

29. In Gray's framework for accounting system development, which of the following countries tends to show a relatively high preference for conservative accounting standards?

- A. Norway
- B. United Kingdom
- C. United States of America
- D. Japan

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 3 Hard

30. In Gray's framework for accounting system development, optimism is a value of accounting standards that would most likely be found in ____.

- A. Japan
- B. Australia
- C. Mexico
- D. Brazil

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 3 Hard

31. In Gray's framework for accounting system development, the cultural dimensions of individualism, power distance, uncertainty avoidance, and masculinity directly affect:

- A. accounting systems.
- B. accounting values.
- C. external influences.
- D. ecological influences.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 3 Hard

32. Individualism, power distance, uncertainty avoidance, and masculinity are examples of:

- A. accounting values.
- B. ecological factors.
- C. cultural dimensions.
- D. external forces.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

33. The concepts of professionalism, uniformity, conservatism, and secrecy are classified in Gray's framework for accounting system development as:

- A. accounting values.
- B. accounting systems.
- C. institutional consequences.
- D. cultural dimensions.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

34. According to Gray's framework for accounting system development, which of the following is directly affected by ecological influences, such as geography, demography, and technology?

- A. Accounting values
- B. Accounting systems
- C. Institutional consequences
- D. Cultural dimensions

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 3 Hard

35. According to Gray's framework for accounting system development, the counterpart to the accounting value of "secrecy" is:

- A. professionalism.
- B. transparency.**
- C. optimism.
- D. flexibility.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

36. In their 1993 paper, Douppnik and Salter found that countries tended to cluster in terms of the similarities or differences of their accounting systems. These researchers attribute the large cluster around United Kingdom to:

- A. the superiority of the Anglo accounting model.
- B. the predominant influence of Great Britain in the world economy.
- C. the colonial influence of Great Britain on accounting development.**
- D. the fact that more of the world's people speak English than any other language.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

37. The 1993 study by Douppnik and Salter found that a cluster of Latin American countries indicated that the similarity of their accounting systems was related to:

- A. a common currency.
- B. the importance of inflation.**
- C. the colonial influence of Spain.
- D. the colonial influence of the United States of America.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

38. In some countries, financial institutions operate under Shariah, which also gives guidance about accounting practice in these institutions. Shariah is the:

- A. financial accounting standards board in Saudi Arabia.
- B. law governing human conduct that is derived from the Koran.
- C. codification of banking regulations in the European Union.
- D. political system used in South American countries.

Learning Objective: 02-05 Discuss the influence that culture is thought to have on financial reporting.

Level of Difficulty: 2 Medium

39. The term "Class A Accounting" as it is used by the researcher Christopher Nobes refers to:

- A. conservative accounting systems.
- B. the most efficient accounting systems.
- C. accounting systems that primarily serve external shareholders.
- D. accounting systems developed primarily for creditors and taxing authorities.

Learning Objective: 02-06 Describe a simplified model of the reasons for international differences in financial reporting.

Level of Difficulty: 2 Medium
