

Chapter 2

JOB ORDER COSTING AND ANALYSIS

True/False Questions

1. Cost accounting systems accumulate manufacturing costs and then assign them to products and services.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

2. A company that uses a cost accounting system normally has only two inventory accounts: Finished Goods Inventory and Work in Process Inventory.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

3. Cost accounting information is helpful to management for pricing decisions but has no effect on controlling costs.

Answer: False

Blooms: Understand
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-C1
Topic: Job Order Costing

4. There are two basic types of cost accounting systems: job order costing and periodic costing.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

5. There are two basic types of cost accounting systems: job order costing and process costing.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

6. A company that produces a large number of standardized units would normally use a job order costing system.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

7. A company that produces products individually designed to meet the needs of a specific customer would normally use a job order costing system.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

8. Job order production systems would be appropriate for companies that produce custom homes, specialized equipment, and special computer systems.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

9. Job order production systems would be appropriate for companies that produce compact disks or disposable cameras.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

10. A job order costing system would be appropriate for a manufacturer of automobile tires.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

11. Job order production systems would be appropriate for companies that produce training films for a specific customer or custom-made furniture to be used in a new five-star resort hotel.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

12. When a job involves producing more than one unit of a custom product, it is often called a job lot.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

13. A company's file of job cost sheets for jobs that are not yet completed equals the balance in the Finished Goods Inventory account.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet

14. A company's file of job cost sheets for jobs that are not yet completed equals the balance in the Work in Process Inventory account.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet

15. A company's file of job cost sheets for jobs that are completed but not yet sold equals the balance in the Finished Goods Inventory account.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet

16. A company's file of job cost sheets for jobs that are completed but not yet sold equals the balance in the Work in Process Inventory account.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet

17. The direct materials section of a job cost sheet shows the materials costs assigned to a specific job, but the direct labor section only shows the total hours of labor allocated to the job.

Answer: False

Blooms: Understand
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-C2

Topic: Job cost sheet

18. The collection of cost sheets for unfinished jobs makes up a subsidiary ledger controlled by the Work in Process Inventory account in the general ledger.

Answer: True

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

19. A job cost sheet is useful for developing financial accounting numbers but does not contain information that is useful for managing the production process.

Answer: False

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

20. Job cost sheets are used to track all of the costs assigned to a job, including direct materials, direct labor, overhead, and all selling and administrative costs.

Answer: False

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

21. When a job is finished, its job cost sheet is completed and moved from the file of jobs in process to the file of finished jobs that are yet to be delivered to customers.

Answer: True

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2*

Topic: Job cost sheet

22. The file of job cost sheets for completed but undelivered jobs equals the balance in the Work in Process Inventory account.

Answer: False

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

23. Both direct and indirect labor costs are recorded on the individual job cost sheets.

Answer: False

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

24. Job cost sheets include both product and period costs.

Answer: False

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

25. Only product costs are recorded on job cost sheets.

Answer: True

*Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C2
Topic: Job cost sheet*

26. Service firms, unlike manufacturing firms, should only use actual costs when determining a selling price for their services.

Answer: False

Blooms: Understand
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-A1
Topic: Pricing for Services

27. Job order costing is applicable to manufacturing firms only and not service firms.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-A1
Topic: Pricing for Services

28. The cost of all direct materials issued to production is debited to Work in Process Inventory.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

29. A materials requisition is a source document used by production managers to request materials for production and also used to assign materials costs to specific jobs or to overhead.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

30. When materials are used as indirect materials, their cost is debited to the Factory Overhead account.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

31. A materials requisition is a source document used by materials managers of a manufacturing company to order raw materials from suppliers; it serves the same purpose as a purchase order in a merchandising company.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

32. A receiving report serves as the source document for recording materials received in both a materials ledger card and in the general ledger.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

33. In nearly all job order cost systems, materials ledger cards are perpetual records that are updated each time materials are purchased or issued for use in production.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

34. The journal entry to record the usage of Direct Materials includes a debit to Work in Process Inventory.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

35. The journal entry to record the usage of Indirect Materials includes a debit to Work in Process Inventory.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Learning Objective: 02-P3
Topic: Materials Cost Flows and Documents
Topic: Overhead Cost Flows and Documents

36. The journal entry to record the purchase of materials includes a debit to Work in Process Inventory.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

37. Materials requisitions and time tickets are cost accounting source documents.

Answer: True

Blooms: Remember

AACSB: Communication

AICPA BB: Industry

AICPA FN: Measurement

Difficulty: 1 Easy

Learning Objective: 02-P1

Learning Objective: 02-P2

Topic: Materials Cost Flows and Documents

Topic: Labor Cost Flows and Documents

38. A time ticket is a source document used by an employee to record the number of hours worked on a particular job during the work day.

Answer: True

Blooms: Remember

AACSB: Communication

AICPA BB: Industry

AICPA FN: Measurement

Difficulty: 1 Easy

Learning Objective: 02-P2

Topic: Labor Cost Flows and Documents

39. A time ticket is a source document that an employee uses to report how much direct labor was performed for a job and is used to determine the amount of direct labor to charge to the job.

Answer: True

Blooms: Remember

AACSB: Communication

AICPA BB: Industry

AICPA FN: Measurement

Difficulty: 1 Easy

Learning Objective: 02-P2

Topic: Labor Cost Flows and Documents

40. A time ticket is a source document that an employee uses to report how much indirect labor was performed for a job and is used to determine the amount of direct labor to charge to the job.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P2
Topic: Labor Cost Flows and Documents

41. A time ticket is a source document used by an employee to record the total number of hours worked and serves as a source document for entries to record labor costs.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P2
Topic: Labor Cost Flows and Documents

42. When time ticket information is entered into the accounting system, the journal entry is a debit to Factory Wages Payable and a credit to Work in Process Inventory.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P2
Topic: Labor Cost Flows and Documents

43. The predetermined overhead rate is used to allocate overhead cost to jobs.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

44. Factory overhead is often collected and summarized in a subsidiary factory overhead ledger.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

45. Predetermined overhead rates are calculated at the end of the accounting period once the actual amount of factory overhead is known.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

46. Predetermined overhead rates are calculated before the start of the accounting period, and are therefore based on estimates.

Answer: True

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

47. Predetermined overhead rates are necessary because cost accountants use periodic inventory systems.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

48. The predetermined overhead rate based on direct labor cost is the ratio of estimated overhead cost to estimated direct labor cost for the period.

Answer: True

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

49. In a job order costing system, indirect labor costs are debited to the Factory Overhead account.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P2
Topic: Overhead Cost Flows and Documents

50. Since a predetermined overhead rate is established before a period begins, this rate is revised many times during the period to compensate for inaccurate estimates previously made.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

51. Under a job order costing system, individual jobs are always charged with actual overhead costs when they are transferred to finished goods.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

52. Actual factory overhead incurred in a job costing system is debited to a Factory Overhead general ledger account and credited to various other accounts.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

53. Direct materials and direct labor are examples of costs that are debited to the Factory Overhead account in a job costing system.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

54. There should be a “cause and effect” relation between the overhead allocation base and overhead costs.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

55. Overapplied overhead is the amount by which actual overhead cost exceeds the overhead applied to products during the period.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

56. Underapplied overhead is the amount by which actual overhead cost exceeds the overhead applied to products during the period.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

57. When actual overhead cost exceeds the overhead applied, overhead is said to be underapplied.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

58. When actual overhead cost exceeds the overhead applied, overhead is said to be overapplied.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

59. In a job order costing system, any immaterial underapplied overhead at the end of the period can be charged entirely to Cost of Goods Sold.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

60. If actual overhead incurred during a period exceeds applied overhead, the difference will be a credit balance in the Factory Overhead account at the end of the period.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

61. If actual overhead incurred during a period exceeds applied overhead, the difference will be a debit balance in the Factory Overhead account at the end of the period.

Answer: True

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

62. The Factory Overhead account will have a credit balance at the end of a period if overhead applied during the period is greater than the overhead incurred.

Answer: True

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

63. The Factory Overhead account will have a debit balance at the end of a period if overhead applied during the period is greater than the overhead incurred.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

64. Material amounts of under- or overapplied factory overhead are always closed entirely to Cost of Goods Sold at the end of an accounting period.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

65. Underapplied overhead is the amount by which overhead applied to jobs using the predetermined overhead rate exceeds the actual overhead incurred during a period.

Answer: False

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

66. Overapplied overhead is the amount by which overhead applied to jobs using the predetermined overhead rate exceeds the actual overhead incurred during a period.

Answer: True

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

67. Overapplied or underapplied overhead should be removed from the Factory Overhead account at the end of each accounting period.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P4
Topic: Underapplied or Overapplied Overhead

68. If overhead is underapplied, it means that individual jobs have not been charged enough during the year and the cost of goods sold reported is too low.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

69. If overhead is overapplied, it means that individual jobs have not been charged enough overhead during the year and the cost of goods sold reported is too low.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

70. If overhead is overapplied, it means that individual jobs have been charged too much overhead during the year and the cost of goods sold reported is too high.

Answer: True

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

71. If overhead is underapplied, it means that individual jobs have been charged too much during the year and the cost of goods sold reported is too high.

Answer: False

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

72. The schedule of cost of goods manufactured for a job costing system includes total actual factory overhead.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

73. Period costs for a manufacturing company, such as selling and administrative expenses, are recorded directly to Work in Process Inventory when they are incurred.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

74. Manufacturing costs incurred for jobs completed during an accounting period can bypass the inventory accounts on the balance sheet and be recorded directly in expense accounts.

Answer: False

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

Multiple Choice Questions

75. Cost accounting systems used by manufacturing companies are based on the:

- A. Periodic inventory system.
- B. Perpetual inventory system.
- C. Finished goods inventories.
- D. Weighted average inventories.
- E. LIFO inventory system.

Answer: B

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

76. A system of accounting for production operations that produces timely information about inventories and manufacturing costs per unit of product is a:

- A. Finished goods accounting system.
- B. General accounting system.
- C. Manufacturing accounting system.
- D. Cost accounting system.
- E. Production accounting system.

Answer: D

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

77. Job order costing systems normally use:

- A. Periodic inventory systems.
- B. Perpetual inventory systems.
- C. Real inventory systems.
- D. General inventory systems.
- E. Weighted average inventory systems.

Answer: B

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

78. In comparison to a general accounting system, a cost accounting system for a manufacturing company places an emphasis on:
- A. Periodic inventory counts.
 - B. Total costs.
 - C. Continually updating costs of materials, work in process, and finished goods inventories.
 - D. Products and average costs.
 - E. Large volume operations involving standardized products.

Answer: C

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

79. Features of a job costing system include all but which of the following:
- A. Diversity of products produced.
 - B. Mass production.
 - C. Heterogeneity
 - D. Customization
 - E. Separate manufacturing from other products

Answer: B

Blooms: Understand
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

80. The two basic types of cost accounting systems are:
- A. Job order costing and perpetual costing.
 - B. Job order costing and customized product costing.
 - C. Job order costing and customized service costing.
 - D. Job order costing and process costing.
 - E. Job order costing and periodic costing.

Answer: D

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

81. The production activities for a customized product represent a(n):

- A. Operation.
- B. Job.
- C. Unit.
- D. Pool.
- E. Process.

Answer: B

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

82. A job order costing system would best fit the needs of a company that makes:

- A. Shoes and apparel.
- B. Paint.
- C. Cement.
- D. Custom machinery.
- E. Pencils and erasers.

Answer: D

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-C1
Topic: Job Order Costing

83. Job order production is also known as:

- A. Mass production.
- B. Process production.
- C. Unit production.
- D. Customized production.
- E. Standard costing.

Answer: D

Blooms: Remember
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

84. Omega Contractors manufactures each house to customer specifications. It most likely would use:

- A. Process costing.
- B. A periodic inventory system.
- C. Unique costing.
- D. Job order costing.
- E. Activity-based costing.

Answer: D

Blooms: Remember
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-C1
Topic: Job Order Costing

85. A type of production that yields customized products or services for each customer is called:

- A. Customer orientation production.
- B. Job order production.
- C. Just-in-time production.
- D. Job lot production.
- E. Process production.

Answer: B

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-C1
Topic: Job Order Costing

86. A company that makes which of the following types of products would best be suited for a job costing system?

- A. Fruit juice
- B. Bathing suits
- C. Snack chips
- D. Compact discs
- E. Custom jewelry

Answer: E

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-C1
Topic: Job Order Costing

87. The target cost for a job using job costing is calculated as:

- A. direct costs + desired profit
- B. direct costs – desired profit
- C. expected selling price – direct costs
- D. expected selling price – desired profit
- E. expected selling price + desired profit

Answer: D

Blooms: Remember

AACSB: Communication

AICPA BB: Industry

AICPA FN: Measurement

Difficulty: 1 Easy

Learning Objective: 02-C1

Topic: Job Order Costing

88. A job order production system would be appropriate for a company that produces which one of the following items?

- A. A landscaping design for a new hospital.
- B. Seedlings for sale in a nursery.
- C. Sacks of yard fertilizer.
- D. Packets of flower seeds.
- E. Small gardening tools, including rakes, shovels, and hoes.

Answer: A

Blooms: Understand
AACSB: Analytic
AICPA BB: Industry
AICPA FN: Measurement

Learning Objective: 02-C2
Topic: Job cost sheet

Feedback:

Cost of goods sold:

<i>Job 134:</i>	<i>\$1,700</i>
<i>Job 135: (\$1,200 + \$300)</i>	<i><u>1,500</u></i>
	<i><u>\$3,200</u></i>

Work in Process inventory:

<i>Job 136:</i>	<i><u>\$ 900</u></i>
-----------------	----------------------

93. Job A3B was ordered by a customer on September 25. During the month of September, Jaycee Corporation requisitioned \$2,500 of direct materials and used \$4,000 of direct labor. The job was not finished by the end of the month, but needed an additional \$3,000 of direct materials and additional direct labor of \$6,500 to finish the job in October. The company applies overhead at the end of each month at a rate of 200% of the direct labor cost incurred. What is the balance in the Work in Process account at the end of September relative to Job A3B?

- A. \$5,500
- B. \$11,500
- C. \$6,500
- D. \$9,500
- E. \$14,500

Answer: E

Blooms: Apply

98. The Work in Process Inventory account of a manufacturing company that uses an overhead rate based on direct labor cost has a \$3,200 debit balance after all posting is completed. The cost sheet of the one job still in process shows direct material cost of \$1,400 and direct labor cost of \$800. Therefore, the amount of the applied overhead is:

- A. \$1,800.
- B. \$2,200
- C. \$1,000
- D. \$800
- E. \$2,400

Answer: C

Blooms: Apply
AACSB: Analytic
AICPA BB: Critical Thinking
AICPA FN: Measurement
Difficulty: 1 Easy
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

Feedback: $WIP = DM + DL + OH$
 $\$3,200 = \$1,400 + \$800 + OH$
 $OH = \$3,200 - 1,400 - 800 = \$1,000$

99. The Work in Process Inventory account of a manufacturing company that uses an overhead rate based on direct labor cost has a \$4,400 debit balance after all posting is completed. The cost sheet of the one job still in process shows direct material cost of \$2,000 and direct labor cost of \$800. Therefore, the company's overhead application rate is:
- A. 40% of direct labor cost.
 - B. 50% of direct labor cost.
 - C. 80% of direct labor cost.
 - D. 200% of direct labor cost.
 - E. 300% of direct labor cost.

Answer: D

149. Minstrel Manufacturing uses a job order costing system. During one month, Minstrel purchased \$198,000 of raw materials on credit; issued materials to production of \$195,000 of which \$30,000 were indirect. Minstrel incurred a factory payroll of \$150,000, of which \$40,000 was indirect labor. Minstrel uses a predetermined overhead application rate of 150% of direct labor cost. If Minstrel incurred total overhead costs of \$167,800 during the month, compute the amount of under- or overapplied overhead:

- A. \$2,800 overapplied.
- B. \$17,800 underapplied.
- C. \$2,800 underapplied.
- D. \$17,800 overapplied.
- E. \$57,200 overapplied.

Learning Objective: 02-P4

Topic: Underapplied or Overapplied Overhead

Feedback: OH rate = $\$396,000 / \$220,000 = 180\%$

*Applied = $\$224,000 * 1.8 = \$403,200$; $\$413,200 - \$403,200 = \$10,000$ underapplied*

155. Using the following accounts and an overhead rate of 130% of direct labor cost, compute the amount of applied overhead.

Work in Process Inventory		Finished Goods Inventory	
Beginning WIP	35,200	Beginning FG	5,200
Direct materials	55,300	Cost of Goods Mfg'd	203,300
Direct labor	?		
Factory Overhead	?		
To Finished Goods	203,300		
Ending WIP	25,200		

- A. \$ 78,000.
- B. \$ 60,000.
- C. \$138,000.
- D. \$ 71,890.
- E. \$ 90,500.

Answer: A

Blooms: Apply
AACSB: Analytic
AICPA BB: Critical Thinking
AICPA FN: Measurement
Difficulty: 3 Hard
Learning Objective: 02-P3
Topic: Overhead Cost Flows and Documents

Feedback: $\$35,200 + 55,300 + DL + OH - 203,300 = \$25,200$
 $DL + OH = \$25,200 - 35,200 - 55,300 + 203,300$
 $DL + OH = \$138,000$; $DL + 1.3DL = \$138,000$; $2.3DL = \$138,000$; $DL = \$60,000$
 $\$60,000 + OH = \$138,000$; $OH = \$78,000$

156. Portside Watercraft uses a job order costing system. During one month Portside purchased \$173,000 of raw materials on credit; issued materials to production of \$164,000 of which \$24,000 were indirect. Portside incurred a factory payroll of \$95,000, of which \$25,000 was indirect labor. Portside uses a predetermined overhead rate of 170% of direct labor cost. The journal entry to record the issuance of materials to production is:

- A. Debit Raw Materials Inventory \$153,000; credit Accounts Payable \$153,000.
- B. Debit Work in Process Inventory \$140,000; debit Factory Overhead \$24,000; credit Raw Materials Inventory \$164,000.
- C. Debit Raw Materials Inventory \$195,000; credit Work in Process Inventory \$195,000.
- D. Debit Work in Process Inventory \$140,000; debit Raw Materials Inventory \$24,000; credit Materials Inventory \$164,000.
- E. Debit Finished Goods Inventory \$140,000; credit Raw Materials Inventory \$140,000.

Matching Questions

161. Match the following terms to the appropriate definition.

- A. Cost accounting system
- B. Time ticket
- C. Finished Goods Inventory
- D. Materials requisition
- E. Underapplied overhead
- F. Work in Process Inventory
- G. Overapplied overhead
- H. Job cost sheet
- I. Job order costing system
- J. Predetermined overhead rate
- K. Materials ledger card

_____ 1. The production of products in response to special orders; also called customized production.

_____ 2. Records manufacturing activities using a perpetual inventory system.

_____ 3. The amount by which the overhead applied to jobs in a period with the predetermined overhead rate exceeds the actual overhead incurred in a period.

_____ 4. An asset account where costs are accumulated while jobs are being produced.

_____ 5. The rate established prior to the beginning of a period that relates estimated overhead to an allocation factor such as estimated direct labor and is used to assign overhead cost to a job.

_____ 6. An asset account where costs of completed jobs reside until the jobs are delivered to customers.

_____ 7. A source document that production managers use to request materials needed for manufacturing and that is used to assign materials costs to specific jobs or to overhead.

_____ 8. A perpetual record that is updated each time units of raw material are purchased and issued for use in production.

_____ 9. A source document that is used to report how much time an employee spent working on a job or on overhead activities and the labor costs to assign to jobs or overhead.

_____ 10. The amount by which actual overhead incurred in a period exceeds the overhead applied to jobs with the predetermined overhead rate.

_____ 11. A separate record maintained for each job in a job order costing system; it shows the costs of direct materials, direct labor, and overhead for each job.

Answer:

1. I; 2. A; 3. G; 4. F; 5. J; 6. C; 7. D; 8. K; 9. B; 10. E; 11. H

Short Answer Questions

162. What is a cost accounting system? What are the two basic types of cost accounting systems?

Answer: A cost accounting system is an accounting system that uses a perpetual inventory system to continuously update records for costs of materials, work in process, and finished goods inventories. It also provides timely information about inventories and manufacturing costs per unit of product. The two basic types of cost accounting systems are job order costing and process costing.

163. Describe the purpose of a job cost sheet, and explain what information is found on the job cost sheet.

Answer: A job cost sheet is a separate record that is maintained for each job. The job cost sheet will include the job number, the customer name, and the costs of the job separated into direct materials, direct labor, and overhead.

Learning Objective: 02-C1
Topic: Job Order Costing

164. Explain how a service firm, such as an advertising agency, might use job order costing.

Answer: Since most jobs in a service firm such as an advertising agency have unique requirements, a job order costing system is appropriate. The service firm would estimate the labor required for each customer order, and then add overhead to the estimated labor based on a predetermined overhead rate. This estimated total cost could be used to prepare a bid for a potential customer. Cost of the job is one factor to consider when determining a potential selling price (bid) for a service.

165. Describe how materials flow through a job order costing system, and identify the key documents in the system.

Answer: When materials are received from suppliers, they are inspected and counted, and the information is recorded on a *receiving report*. The *materials ledger card* is a perpetual record that keeps track of each item of raw materials. When materials are needed for production, a *materials requisition* is prepared and the materials are issued into production. Direct materials are added to the *job cost sheet*. Indirect materials are added to overhead.

AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P1
Topic: Materials Cost Flows and Documents

166. Describe the flow of the raw materials, both direct and indirect, through the inventory accounts from purchase to use.

Answer: When raw materials are purchased, the cost is debited to Raw Materials Inventory. When materials are requisitioned for use, the direct materials are moved from Raw Materials Inventory to Work in Process Inventory and the indirect materials are moved from Raw Materials Inventory to the Factory Overhead account.

167. Describe the flow of labor costs in a job order costing system, and identify the documents used in the system.

Answer: Labor costs are classified as either direct or indirect. The flow of direct labor costs in a job order costing system begins by employee tracking their hours worked to specific jobs using *time tickets*. Employees who perform work classified as indirect labor also use time tickets, but their work is not assigned to individual jobs, but to overhead.

Blooms: Understand
AACSB: Communication
AICPA BB: Industry
AICPA FN: Measurement
Difficulty: 2 Medium
Learning Objective: 02-P2
Topic: Labor Cost Flows and Documents

168. Describe the flow of the employee labor, both direct and indirect, through the inventory accounts.

Answer: Direct labor is assigned to jobs using time tickets and is recorded in Work in Process Inventory as it is incurred. The indirect labor that comes from time tickets or salary contracts is recorded in the Factory Overhead account.

Topic: Labor Cost Flows and Documents
Topic: Overhead Cost Flows and Documents

169. Explain what a predetermined overhead rate is, how it is calculated, and why it is used.

Answer: A predetermined overhead rate is used to apply factory overhead costs to jobs produced during the period. It is calculated by dividing estimated overhead costs for a period by an allocation factor such as estimated direct labor hours. It is used because overhead costs benefit all jobs and cannot be directly related to any one job. In addition, the perpetual inventory system requires an estimate of overhead for timeliness of information for decision making.

170. Explain why the Factory Overhead account for a company may have a difference between the amount debited and the amount credited, resulting in an end of period balance prior to adjustment.

Answer: If a company incurs more actual overhead than it applies to jobs during the period, the Factory Overhead will have an ending debit balance. If a company applies more overhead to jobs than it actually incurs, Factory Overhead will have an ending credit balance.

Blooms: Understand
AACSB: Communication

Problems

172. The Merker Manufacturing Company has the following job cost sheets on file. They represent jobs that have been worked on during April of the current year. This table summarizes information provided on each sheet:

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
544	\$15,050	Finished and delivered
545	\$22,400	Finished and delivered
546	\$ 7,500	Finished and unsold
547	\$ 4,300	Finished and delivered
548	\$33,000	Unfinished
549	\$62,000	Finished and unsold
550	\$14,600	Unfinished
551	\$22,200	Finished and delivered
552	\$ 3,600	Finished and unsold
553	\$ 1,000	Unfinished

- (a) What is the cost of goods sold for the month of April?
- (b) What is the cost of the Work in Process inventory on April 30?
- (c) What is the cost of the finished goods inventory on April 30?

Answer:

(a) Cost of goods sold for April:

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
544	\$15,050	<i>Finished and delivered</i>
545	\$22,400	<i>Finished and delivered</i>
547	\$ 4,300	<i>Finished and delivered</i>
551	<u>22,200</u>	<i>Finished and delivered</i>
<i>Total</i>	<u>\$63,950</u>	

(b) *Cost of the Work in Process inventory on April 30:*

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
548	33,000	Unfinished
550	\$14,600	Unfinished
553	<u>1,000</u>	Unfinished
Total	<u>\$48,600</u>	

(c) *Cost of the finished goods inventory on April 30:*

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
546	\$ 7,500	Finished and unsold
549	62,000	Finished and unsold
552	3,600	Finished and unsold

Topic: Job Cost Sheet

173. The Luna Manufacturing Company has the following job cost sheets on file. They represent jobs that have been worked on during September of the current year. This table summarizes information provided on each sheet:

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
951	\$ 4,200	Finished and delivered
952	\$ 7,700	Unfinished
953	\$ 9,300	Finished and unsold
954	\$11,100	Finished and delivered
955	\$ 3,000	Finished and unsold
956	\$ 5,500	Finished and delivered
957	\$35,000	Unfinished
958	\$ 3,200	Finished and delivered
959	\$ 500	Unfinished
960	\$22,110	Unfinished
961	\$ 7,200	Finished and delivered
962	\$ 8,500	Unfinished
963	\$11,200	Finished and unsold

- (a) What is the cost of the Work in Process inventory on September 30?
 (b) What is the cost of the finished goods inventory on September 30?
 (c) What is the cost of goods sold for the month of September?

Answer:

(a) *Cost of the Work in Process inventory on September 30:*

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
952	\$ 7,700	Unfinished
957	35,000	Unfinished
959	500	Unfinished
960	22,110	Unfinished
962	<u>8,500</u>	Unfinished
<i>Total</i>	<u><i>\$73,810</i></u>	

(b) *Cost of the finished goods inventory on September 30:*

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
953	\$ 9,300	Finished and unsold
955	3,000	Finished and unsold
963	<u>11,200</u>	Finished and unsold
<i>Total</i>	<u><i>\$23,500</i></u>	

(c) Cost of goods sold for September:

<u>Number</u>	<u>Total Cost Incurred</u>	<u>Status of Job</u>
951	\$ 4,200	Finished and delivered
954	11,100	Finished and delivered
956	5,500	Finished and delivered
958	3,200	Finished and delivered

175. The following data relates to the Mass Company's first operating period. Calculate the total cost of goods sold for each product.

<i>Product</i>	<i>Cost/unit</i>		<i>Units Produced</i>	<i>Ending Inventory</i>	<i>Overhead rate (Percent of Direct Labor cost)</i>
	<i>Direct Materials</i>	<i>Direct Labor</i>			
<i>A</i>	<i>\$10</i>	<i>\$12</i>	<i>215</i>	<i>115</i>	<i>60%</i>
<i>B</i>	<i>8</i>	<i>15</i>	<i>330</i>	<i>180</i>	<i>40%</i>
<i>C</i>	<i>14</i>	<i>10</i>	<i>250</i>	<i>200</i>	<i>80%</i>

Answer:

	<u>A</u>	<u>B</u>	<u>C</u>
Direct materials	\$10.00	\$ 8.00	\$14.00
Direct labor	12.00	15.00	10.00
Overhead*	<u>7.20</u>	<u>6.00</u>	<u>8.00</u>
Total cost	\$29.20	\$29.00	\$32.00
Units sold**	<u>x 100</u>	<u>x 150</u>	<u>x 50</u>
Cost of goods sold	<u>\$2,920</u>	<u>\$4,350</u>	<u>\$1,600</u>

* Overhead applied:

A: $\$12.00 \times 60\% = \7.20 ; B: $\$15.00 \times 40\% = \6.00 ; C: $\$10.00 \times 80\% = \8.00

** Units sold

A: 215 produced – 115 in ending inventory = 100 sold

B: 330 produced – 180 in ending inventory = 150 sold

C: 250 produced – 200 in ending inventory = 50 sold

181. EXP, Inc. had the following activities during its most recent period of operations:
- (a) Purchased raw materials on account for \$140,000 (both direct and indirect materials are recorded in the Raw Materials Inventory account).
 - (b) Issued raw materials to production of \$130,000 (80% direct and 20% indirect).
 - (c) Incurred factory labor costs of \$250,000; allocated the factory labor costs to production (70% direct and 30% indirect).
 - (d) Incurred factory utilities costs of \$20,000; this amount is still payable.
 - (e) Applied overhead at 80% of direct labor costs.
 - (f) Recorded factory depreciation, \$22,000.

Prepare journal entries to record the above transactions.

Answer:

(a)	Raw Materials Inventory	140,000	
	Accounts Payable		140,000
(b)	Work in Process Inventory	104,000	
	Raw Materials Inventory		104,000
	Factory Overhead.....	26,000	
	Raw Materials Inventory.....		26,000
(c)	Work in Process Inventory	175,000	
	Factory Wages Payable		175,000
	Factory Overhead.....	75,000	
	Factory Wages Payable		75,000
(d)	Factory Overhead.....	20,000	
	Accounts Payable		20,000
(e)	Work in Process Inventory	140,000	
	Factory Overhead		140,000
	(\$175,000 * 80% = \$140,000)		
(f)	Factory Overhead.....	22,000	
	Accumulated Depreciation—Factory.....		22,000

182. Lock Production Co. applies factory overhead to production on the basis of direct labor costs. Assume that at the beginning of the current year the company estimated that direct material costs would be \$178,800, direct labor costs would be \$154,000, and factory overhead costs would be \$231,000.

- (1) If the \$28,000 cost of Lock's Work in Process inventory included \$5,200 of direct labor cost, what amount of direct materials cost was included?
 (2) If \$8,100 of the company's \$34,300 finished goods inventory was direct materials cost, determine the direct labor cost and factory overhead cost of the finished goods inventory.

Answer:

- (1) *Overhead rate: (\$231,000/\$154,000) = 150%*

<i>Total cost of Work in Process inventory</i>		<i>\$28,000</i>
<i>Deduct: Direct labor</i>	<i>\$5,200</i>	
<i>Factory overhead (\$5,200 * 150%)</i>	<u><i>7,800</i></u>	<u><i>13,000</i></u>
<i>Direct materials</i>		<u><i>\$15,000</i></u>

- (2) *The overhead rate is 150%. (part 1)*

<i>Total cost of finished goods inventory</i>	<i>\$34,300</i>
<i>Direct materials</i>	<i>8,100</i>
<i>Direct labor and factory overhead costs</i>	<u><i>\$26,200</i></u>

Direct labor + 1.5 (Direct Labor) = \$26,200

Direct Labor = \$10,480

*OH = DL * 1.5*

*OH = \$10,480 * 1.5*

OH = \$15,720

186. A company uses a job order costing system and applies overhead on the basis of direct labor cost. A summary of the company's Work in Process Inventory account for December appears below.

Work in Process					
Date	Explanation	PR	Debit	Credit	Balance
Dec. 1					73,800
Dec.	Direct Materials	G-20	235,800		309,600
Dec.	Direct Labor	G-20	117,000		426,600
Dec.	Factory Overhead	G-20	187,200		613,800
Dec.	Job No. 5 completed	G-8		90,900	522,900
Dec.	Job No. 6 completed	G-10		131,400	391,500
Dec.	Job No. 7 completed	G-12		73,800	317,700
Dec. 31	Job No. 8 completed	G-15		168,300	149,400

Fill in the blanks for the following:

(1) The total cost of the direct materials, direct labor, and factory overhead applied in the December 31 Work in Process inventory is \$_____.

(2) The company's overhead application rate is _____ %

(3) Job No. 6 had \$26,550 of direct labor cost. Therefore, the job must have had \$_____ of direct materials cost.

(4) Job No. 8 had \$73,998 of direct materials cost. Therefore, the job must have had \$_____ of factory overhead cost.

Answer:

(1) \$149,400 (ending balance of account)

(2) $(\$187,200/\$117,000) * 100\% = 160\%$

(3) $\$26,550 * 160\% = \$42,480$; $\$131,400 - \$26,550 - \$42,480 = \$62,370$

(4) $\$168,300 - \$73,998 = \$94,302$ Direct labor + OH; $\$94,302/2.60 = \$36,270$

OH = $\$94,302 - \$36,270 = \$58,032$

188. MOB Corp. maintains an internet-based general ledger. Overhead is applied on the basis of direct labor costs. Its bookkeeper accidentally deleted most of the entries that had been recorded for January. A printout of the general ledger (in T-account form) showed the following:

Raw Materials Inventory				Work in Process Inventory			
DR			CR	DR			CR
Bal 1/1 10,000				Bal 1/1 4,000			f)
a)			b)	c)			
				d)			
				e)			
Bal 17,500				(Bal 1/31) g)			
Accounts Payable				Finished Goods Inventory			
DR			CR	DR			C
h)			Bal. 1/1 5,000	j)			l)
			i)	k)			
			Bal. 1/31 9,000	Bal. 1/31 15,000			
Factory Overhead				Cost of Goods Sold			
DR			CR	DR			CR
m)			n)	o)			

A review of the prior year's financial statements, the current year's budget, and January's source documents produced the following information:

- (1) Accounts Payable is used for raw material purchases only. January purchases were \$49,000.
- (2) Factory overhead costs for January were \$17,000 none of which is indirect materials.
- (3) The January 1 balance for finished goods inventory was \$10,000.
- (4) There was a single job in process at January 31 with a cost of \$2,000 for direct materials and \$1,500 for direct labor.
- (5) Total cost of goods manufactured for January was \$90,000.
- (6) All direct laborers earn the same rate (\$13/hour). During January, 2,500 direct labor hours were worked.
- (7) The predetermined overhead rate is based on direct labor costs. Budgeted (expected) overhead for the year is \$195,000 and budgeted (expected) direct labor is \$390,000.

Fill in the missing amounts a through o above in the T-accounts above.

Answer:

Raw Materials Inventory				Work in Process Inventory			
DR		CR		DR		CR

189. Chen Service applied overhead on the basis of direct labor costs during the current year. Overhead applied was \$16,500. Actual overhead incurred was \$17,200.

- (a) Prepare a journal entry to remove this difference assuming that it is not material.
 (b) Instead, assume actual overhead incurred was \$24,000. Describe (without computations) the alternative procedure that Chen might perform assuming this difference is material.

Answer:

(a) Cost of Goods Sold 700
 Factory Overhead 700

(b) Since the \$7,500 difference is material, it should be allocated among Cost of Goods Sold, Finished Goods Inventory and Work in Process Inventory.

 Learning Objective: 02-P4
 Topic: Underapplied or Overapplied Overhead

190. Calwell Corp. uses a job order costing system. Four jobs were started during the current year. The following is a record of the costs incurred:

Job #	Material Used	Direct Labor Used	Direct Labor Hours Used
1010	\$45,000	\$72,000	8,000
1011	59,000	77,000	7,000
1012	35,000	30,000	3,000
1013	26,000	40,000	5,000

Actual overhead costs were \$55,800. The predetermined overhead rate is \$2.40 per direct labor hour. During the year, Jobs 1010, 1012, and 1013 were completed. Also, Jobs 1010 and 1013 were sold for \$387,000. Assuming that this is Calwell's first year of operations:

- Make the necessary journal entries to charge the costs to the jobs started and to record the completion and sale of finished jobs.
- Calculate the balance in the Work in Process Inventory, Finished Goods Inventory, and Factory Overhead accounts. Does the Factory Overhead account balance indicate an over- or underapplied overhead?

Answer:

Job No.	Direct materials	Direct labor	Overhead applied*	Total job cost
1010	\$45,000	\$72,000	\$19,200	\$136,200
1011	59,000	77,000	16,800	152,800
1012	35,000	30,000	7,200	72,200
1013	<u>26,000</u>	<u>40,000</u>	<u>12,000</u>	<u>78,000</u>
Totals	\$165,000	\$219,000	\$55,200	\$439,200

*Job 1010: 8,000 hours * \$2.40/hour = \$19,200*

*Job 1011: 7,000 hours * \$2.40/hour = \$16,800*

*Job 1012: 3,000 hours * \$2.40/hour = \$7,200*

*Job 1013: 5,000 hours * \$2.40/hour = \$12,000*

Work in Process Inventory	165,000	
Raw Materials Inventory		165,000
Work in Process Inventory	219,000	
Factory Wages Payable		219,000

<i>Work in Process Inventory</i>	55,200	
<i>Factory Overhead</i>		55,200
<i>Finished Goods Inventory</i>	286,400	
<i>Work in Process Inventory</i>		286,400
(\$136,200 + \$72,200 + \$78,000) = \$286,400		
<i>Cost of Goods Sold</i>	214,200	
<i>Finished Goods Inventory</i>		214,200
(\$136,200 + \$78,000 = \$214,200)		
<i>Accounts Receivable</i>	387,000	
<i>Sales</i>		387,000
<i>Work in Process Inventory: Job</i>		
(b)	1011	\$152,800
	<i>Finished Goods: Job 1012</i>	\$72,200
	<i>Factory Overhead:</i>

191. The following information is available for the Annum Corporation for the current year:

Cost of goods sold	\$292,000
Depreciation of factory equipment	25,200
Direct labor	64,750
Finished goods inventory, Beginning-year	45,000
Factory insurance	11,200
Factory utilities	16,800
Goods transferred from Work in Process	
Inventory to Finished Goods Inventory	285,150
Indirect labor	8,400
Raw materials inventory, Beginning-year.....	4,200
Raw materials purchased	116,200
Raw materials used in production	
(includes \$7,000 of indirect materials)	121,800
Rent on factory building	22,400

Annum Company uses a predetermined overhead rate of 150% of direct labor cost. Prepare journal entries for the following transactions and events:

- Purchase of raw materials on account.
- Assignment of materials costs to Work in Process Inventory and Factory Overhead.
- Assignment of Factory Payroll to Work in Process Inventory and Factory Overhead.
- Recording of other factory overhead. Assume that all items other than depreciation are paid in cash.
- Assignment of Factory Overhead to Work in Process Inventory.
- Transfer of goods completed to Finished Goods Inventory.
- Recording cost of goods sold.
- Assignment of over- or underapplied overhead to Cost of Goods Sold.

Answer:

a.	Raw Materials Inventory	116,200	
	Accounts Payable		116,200
b.	Work in Process Inventory	114,800	
	Raw Materials Inventory.....		114,800
	Factory Overhead	7,000	
	Raw Materials Inventory.....		7,000
c.	Work in Process Inventory	64,750	

	<i>Factory Wages Payable</i>	64,750
	<i>Factory Overhead</i>	8,400
	<i>Factory Wages Payable</i>	8,400
d.	<i>Factory Overhead</i>	75,600
	<i>Accumulated Depreciation-Factory Equipment...</i>	25,200
	<i>Cash</i>	50,400
e.	<i>Work in Process Inventory</i>	97,125
	<i>Factory Overhead (64,750 * 150%)</i>	97,125
f.	<i>Finished Goods Inventory</i>	285,150
	<i>Work in Process Inventory</i>	285,150
g.	<i>Cost of Goods Sold</i>	292,000
	<i>Finished Goods Inventory</i>	292,000
h.	<i>Factory Overhead</i>	6,125
	<i>Cost of Goods Sold</i>	6,125
	<i>Actual Overhead = \$7,000 + 8,400 + 75,600 = \$91,000</i>	
	<i>Overhead applied =</i>	<u>\$97,125</u>
	<i>Overapplied overhead =</i>	<u>\$ 6,125</u>

194. Selected information from the budget of the Singh Corp. at the beginning of the year follows:

Estimated factory overhead	\$132,000
Estimated direct labor hours.....	55,000 hours
Estimated machine hours.....	41,250 hours
Estimated direct labor cost	\$825,000
Actual factory overhead incurred during the year	\$144,000

Calculate the predetermined overhead rate if the company uses the following as a basis:

- (a) Direct labor hours.
- (b) Direct labor cost.
- (c) Machine hours.

Answer:

- (a) $\$132,000/55,000 = \2.40 per direct labor hour
- (b) $\$132,000/\$825,000 = 16\%$ of direct labor cost
- (c) $\$132,000/41,250 = \3.20 per machine hour

198. The job cost sheet for Job number 83-421 includes the following information:

DIRECT MATERIALS:

7/12 Requisition R88-566: 20 units @ \$ 3.50 per unit
7/13 Requisition R88-576: 18 units @ \$ 5.00 per unit
7/13 Requisition R88-578: 4 units @ \$25.00 per unit
7/14 Requisition R88-591: 40 units @ \$ 1.25 per unit

DIRECT LABOR:

7/12 Employee 19: 8 hours @ \$ 9.00 per hour
7/13 Employee 19: 6 hours @ \$ 9.00 per hour
7/13 Employee 37: 6 hours @ \$ 7.00 per hour
7/14 Employee 19: 5 hours @ \$ 9.00 per hour
7/14 Employee 92: 5 hours @ \$11.00 per hour

FACTORY OVERHEAD: Assigned at 150% of direct labor cost.

What is the total cost of Job number 83-421?

Answer:

Total cost of job:

DIRECT MATERIALS:

7/12 Requisition R88-566: 20 units @ \$ 3.50 per unit ...	=	\$ 70
7/13 Requisition R88-576: 18 units @ \$ 5.00 per unit ...	=	90
7/13 Requisition R88-578: 4 units @ \$25.00 per unit ...	=	100
7/14 Requisition R88-591: 40 units @ \$ 1.25 per unit ...	=	<u>50</u>
Total direct materials cost	=	<u>\$310</u>

DIRECT LABOR:

7/12 Employee 19: 8 hours @ \$ 9.00 per hour	=	\$ 72
7/13 Employee 19: 6 hours @ \$ 9.00 per hour	=	54
7/13 Employee 37: 6 hours @ 7.00 per hour	=	42
7/14 Employee 19: 5 hours @ \$ 9.00 per hour	=	45
7/14 Employee 92: 5 hours @ \$11.00 per hour	=	<u>55</u>
Total direct labor cost	=	<u>\$268</u>

FACTORY OVERHEAD

150% of direct labor cost (150% * \$268)	=	<u>\$402</u>
--	---	--------------

TOTAL COST ASSIGNED TO THE JOB	=	<u>\$980</u>
---------------------------------------	---	---------------------

199. The following calendar year information about the Tchulahoma Corporation is available on December 31:

Advertising expense.....	\$ 28,800
Depreciation of factory equipment.....	42,320
Depreciation of office equipment.....	10,800
Direct labor.....	142,600
Factory utilities.....	35,650
Interest expense.....	6,650
Inventories, January 1:	
Raw materials.....	3,450
Work in Process.....	17,250
Finished goods.....	35,600
Inventories, December 31:	
Raw materials.....	2,300
Work in Process.....	20,700
Finished goods.....	31,050
Raw materials purchases.....	132,450
Rent on factory building.....	41,400
Indirect labor.....	51,750
Sales commissions.....	16,500

The company applies overhead on the basis of 125% of direct labor costs. Calculate the amount of over- or underapplied overhead.

Answer: Factory overhead costs:

<i>Depreciation of factory equipment</i>	<i>\$ 42,320</i>
<i>Factory utilities</i>	<i>35,650</i>
<i>Rent on factory building</i>	<i>41,400</i>
<i>Indirect labor</i>	<i><u>51,750</u></i>
<i>Total actual factory overhead costs</i>	<i>\$171,120</i>

<i>Factory overhead applied (142,600 * 125%) ...</i>	<u><i>\$178,250</i></u>
<i>Overapplied overhead</i>	<u><i>\$ 7,130</i></u>

200. The predetermined overhead rate for Foster, Inc., is based on estimated direct labor costs of \$400,000 and estimated factory overhead of \$500,000. Actual costs incurred were:

Direct materials.....	\$240,000
Direct labor.....	410,000
Indirect materials.....	55,000
Indirect labor.....	125,000
Sales commissions.....	55,000
Factory depreciation.....	170,000
Property taxes, factory.....	15,000
Factory utilities.....	35,000
Advertising.....	62,500
Factory equipment rental.....	110,000

- (a) Calculate the predetermined overhead rate and calculate the overhead applied during the year.
- (b) Determine the amount of over- or underapplied overhead and prepare the journal entry to eliminate the over- or underapplied overhead assuming that it is not material in amount.

Answer:

(a) Predetermined overhead rate = $\$500,000/\$400,000 = 125\%$ of direct labor cost

Overhead applied = $\$410,000 * 125\% = \$512,500$

(b)

Actual overhead:

Indirect materials.....	\$ 55,000
Indirect labor.....	125,000
Factory depreciation	170,000
Property taxes, factory.....	15,000
Factory utilities.....	35,000
Factory equipment rental	<u>110,000</u>
Total actual overhead.....	\$510,000
Overhead applied.....	<u>512,500</u>
Overapplied overhead	<u>\$ 2,500</u>

Factory Overhead.....	2,500	
Cost of Goods Sold		2,500

202. Oddley Corp. uses a job order costing system. The following is selected information pertaining to costs applied to jobs during the year:

Jobs still in process at the end of the year:

\$167,000, which includes \$65,000 direct labor costs.

Jobs finished and sold during the year:

\$395,000, which includes \$172,000 direct labor costs.

Jobs finished but unsold during the year:

\$103,000, which includes \$38,000 direct labor costs.

Oddley Corp.'s predetermined overhead rate is 60% of direct labor cost. At the end of the year, the company's records show that \$189,000 of factory overhead has been incurred.

(a) Determine the amount of overapplied or underapplied overhead.

(b) Prepare the necessary journal entry to close the Factory Overhead account assuming that any remaining balance is not material.

Answer:

(a)	Actual overhead cost	\$189,000	
	Applied overhead (60% * \$275,000)*	<u>165,000</u>	
	Underapplied overhead	<u>\$24,000</u>	
(b)	Cost of Goods Sold	\$24,000	
	Factory Overhead		\$24,000

$$\$65,000 + \$172,000 + \$38,000 = \$275,000$$

203. Taylor Corp. uses a job order costing system and worked only on Job 101 during the current period. Job 101 was sold for \$460,000. The following information pertains to costs incurred for Job 101.

Direct Materials	\$90,000
Indirect Materials	\$30,000
Direct Labor	\$130,000
Indirect Labor	\$75,000
Depreciation of Machinery	\$10,000
Factory Supplies	\$8,000
Overhead Application Rate	90% of direct labor

After adjusting for the amount of over or underapplied overhead, determine the amount of gross profit earned on Job 101.

Answer:

Job Costs:

<i>Direct Materials</i>	<i>\$ 90,000</i>
<i>Direct Labor</i>	<i>130,000</i>
<i>Overhead</i>	<i>117,000</i>
<i>Underapplied Overhead</i>	<i>6,000* (closed to cost of goods sold)</i>
<i>Total Cost of Goods Sold</i>	<u><i>\$343,000</i></u>

Gross Profit:

<i>Sales Price</i>	<i>\$460,000</i>
<i>Less Cost of Goods Sold</i>	<u><i>343,000</i></u>
<i>Gross Profit</i>	<u><i>\$117,000</i></u>

**Actual Overhead Incurred:*

<i>Indirect Materials</i>	<i>\$ 30,000</i>
<i>Indirect Labor</i>	<i>75,000</i>
<i>Depreciation of Machinery</i>	<i>10,000</i>
<i>Factory Supplies</i>	<u><i>8,000</i></u>
<i>Total Actual Overhead</i>	<i>\$ 123,000</i>

204. At the end of June, the job cost sheets for Kennedy Manufacturing show the following total costs accumulated on three custom jobs.

	Job 203	Job 204	Job 205
Direct materials	\$32,000	\$47,000	\$43,000
Direct labor	18,000	22,000	25,000
Overhead	26,100	31,900	36,250

Job 203 was started in production in May and the following costs were assigned to it in May: direct materials, \$12,000; direct labor, \$6,000; and overhead \$8,700. Jobs 204 and 205 are started in June. Overhead cost is applied with a predetermined rate based on direct labor cost. Jobs 203 and 204 are finished in June, and Job 205 will be finished in July. No raw materials are used indirectly in June. Using this information, answer the following questions assuming the company's predetermined overhead rate did not change.

- What is the cost of the raw materials requisitioned in June for each of the three jobs?
- How much direct labor cost is incurred during June for each of the three jobs?
- What predetermined overhead rate is used during June?
- How much total cost is transferred to finished goods during June?

Answer:

<i>a.</i>	<i>Materials for Job 203</i>	<i>\$32,000</i>	
	<i>Less prior costs</i>	<i><u>12,000</u></i>	<i>\$20,000</i>
	<i>Job 204</i>		<i>47,000</i>
	<i>Job 205</i>		<i><u>43,000</u></i>
	<i>Total materials requisitioned</i>		<i><u>\$110,000</u></i>

<i>b.</i>	<i>Labor for Job 203</i>	<i>\$18,000</i>	
	<i>Less prior costs</i>	<i><u>6,000</u></i>	<i>\$12,000</i>
	<i>Job 204</i>		<i>22,000</i>
	<i>Job 205</i>		<i><u>25,000</u></i>
	<i>Total direct labor</i>		<i><u>\$59,000</u></i>

<i>c.</i>		<i>Job 204</i>	<i>Job 205</i>
	<i>Overhead</i>	<i>\$31,900</i>	<i>\$36,250</i>
	<i>Direct labor</i>	<i>22,000</i>	<i>25,000</i>
	<i>Ratio</i>	<i>145%</i>	<i>145%</i>

<i>d.</i>		<i>Job 203</i>	<i>Job 204</i>	<i>Total</i>
	<i>Direct materials</i>	<i>\$32,000</i>	<i>\$47,000</i>	<i>\$79,000</i>
	<i>Direct labor</i>	<i>18,000</i>	<i>22,000</i>	<i>40,000</i>
	<i>Overhead</i>	<i><u>26,100</u></i>	<i><u>31,900</u></i>	<i><u>58,000</u></i>

205. Booth Manufacturing uses a job order costing system that charges overhead to jobs on the basis of direct material cost. At year-end, the Work in Process Inventory account shows the following.

Date	Explanation	Debit	Credit	Balance
Dec. 31	Direct materials cost	980,000		980,000
31	Direct labor cost	320,000		1,300,000
31	Overhead costs	637,000		1,937,000
31	To finished goods		1,818,000	119,000

- Determine the overhead rate used (based on direct material cost).
- Only one job remained in the Work in Process inventory at December 31. Its direct materials cost is \$60,000. How much direct labor cost and overhead cost are assigned to it?

Answer:

a. $\text{Rate} = \$637,000 / \$980,000 = 65\%$

b.	Total cost of job in process	\$119,000	
	Less materials costs of job in process	<u>60,000</u>	\$59,000
	Less overhead applied (\$60,000 * .65)		<u>39,000</u>
	Direct labor cost		<u>\$20,000</u>

206. Franklin Manufacturing uses a job order costing system that charges overhead to jobs on the basis of direct labor cost. Franklin used the following cost predictions: overhead costs \$1,285,750, and direct labor costs of \$695,000. At year-end, the company's records show that actual overhead costs for the year are \$1,278,800, and actual direct labor costs are \$692,000.

- Determine the predetermined overhead rate for the year.
- Compute the amount of overapplied or underapplied overhead.
- Prepare the adjusting entry to allocate the over- or underapplied overhead assuming the amount is immaterial.

Answer:

a. $\$1,285,750 / \$695,000 = 185\%$

b. $\$1,278,800 - (\$692,000 * 1.85) = -\$1,400 \text{ overapplied}$

c.	Factory Overhead.....	1,400	
	Cost of Goods Sold.....		1,400

 Topic: Underapplied or Overapplied Overhead

208. The predetermined overhead rate for Shilling Manufacturing is based on estimated direct labor costs of \$350,000 and estimated factory overhead of \$770,000. Actual costs incurred were:

Direct materials	\$475,000
Direct labor.....	347,000
Indirect materials.....	78,000
Indirect labor	143,500
Sales commissions	150,000
Factory depreciation.....	260,000
Property taxes, factory	35,000
Factory utilities	65,000
Advertising.....	62,500
Factory supervision	185,000

- Calculate the predetermined overhead rate and calculate the overhead applied during the year.
- Determine the amount of over- or underapplied overhead and prepare the journal entry to eliminate the over- or underapplied overhead assuming that it is not material in amount.

Answer:

- $\text{Predetermined overhead rate} = \$770,000 / \$350,000 = 220\% \text{ of direct labor cost}$
 $\text{Overhead applied} = \$347,000 * 220\% = \$763,400$
-

Actual overhead:

Indirect materials.....	\$ 78,000
Indirect labor.....	143,500
Factory depreciation	260,000
Property taxes, factory.....	35,000
Factory utilities.....	65,000
Factory supervision	<u>185,000</u>
Total actual overhead.....	\$766,500
Overhead applied.....	<u>763,400</u>
Underapplied overhead	<u>\$ 3,100</u>

Cost of Goods Sold	3,100	
Factory Overhead.....		3,100
