Chapter 02 - Descriptive Statistics: Tabular and Graphical Displays

1. The minimum number of variables represented in a bar chart is _____.
   a. 1
   b. 2
   c. 3
   d. 4

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Analysis

2. The minimum number of variables represented in a histogram is _____.
   a. 1
   b. 2
   c. 3
   d. 4

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Analysis

3. Which of the following graphical methods is most appropriate for categorical data?
   a. ogive
   b. pie chart
   c. histogram
   d. scatter diagram

ANSWER: b
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Analysis

4. In a stem-and-leaf display, _____.
   a. a single digit is used to define each stem, and a single digit is used to define each leaf
   b. a single digit is used to define each stem, and one or more digits are used to define each leaf
   c. one or more digits are used to define each stem, and a single digit is used to define each leaf
   d. one or more digits are used to define each stem, and one or more digits are used to define each leaf

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

5. A graphical method that can be used to show both the rank order and shape of a data set simultaneously is a _____.
   a. relative frequency distribution
   b. pie chart
   c. stem-and-leaf display
   d. pivot table

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Analysis

6. The proper way to construct a stem-and-leaf display for the data set {62, 67, 68, 73, 73, 79, 91, 94, 95, 97} is to _____.
   a. exclude a stem labeled ‘8’
   b. include a stem labeled ‘8’ and enter no leaves on the stem
   c. include a stem labeled ‘(8)’ and enter no leaves on the stem
   d. include a stem labeled ‘8’ and enter one leaf value of ‘0’ on the stem

ANSWER: b
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

7. Data that provide labels or names for groupings of like items are known as _____.
   a. categorical data
   b. quantitative data
   c. label data
   d. generic data

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1

NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

8. A researcher is gathering data from four geographical areas designated: South = 1; North = 2; East = 3; West = 4. The designated geographical regions represent _____.

a. categorical data
b. quantitative data
c. directional data
d. either quantitative or categorical data

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

9. A researcher asked 20 people for their zip code. The respondents zip codes are an example of _____.

a. categorical data
b. quantitative data
c. label data
d. category data

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

10. The age of employees at a company is an example of _____.

a. categorical data
b. quantitative data
c. label data
d. time series data

ANSWER: b
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

11. A frequency distribution is a _____.

a. tabular summary of a set of data showing the fraction of items in each of several nonoverlapping classes
b. graphical form of representing data
c. tabular summary of a set of data showing the number of items in each of several nonoverlapping classes
d. graphical device for presenting categorical data

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

12. The sum of frequencies for all classes will always equal _____.
a. 1
b. the number of elements in a data set
c. the number of classes
d. a value between 0 and 1

ANSWER: b
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

13. In constructing a frequency distribution, as the number of classes is decreased, the class width _____.
a. decreases
b. remains unchanged
c. increases
d. can increase or decrease depending on the data values

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Analysis

14. If several frequency distributions are constructed from the same data set, the distribution with the widest class width will have the _____.
a. fewest classes
b. most classes
c. same number of classes as the other distributions since all are constructed from the same data
d. None of the answers is correct.

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Analysis

15. Excel's _____ can be used to construct a frequency distribution for categorical data.
    a. DISTRIBUTION function
    b. SUM function
    c. FREQUENCY function
    d. COUNTIF function

ANSWER: d
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

16. There are 20 boys and 8 girls in a class. What type of graph can be used to display this information?
    a. bar graph
    b. stem-and-leaf plot
    c. histogram
    d. scatter diagram

ANSWER: a
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Data Visualization: Best Practices in Creating Effective Graphical Displays
LEARNING OBJECTIVES: MBST.ASWC.18.02.05 - 2.5
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

17. The relative frequency of a class is computed by _____.
    a. dividing the midpoint of the class by the sample size
    b. dividing the frequency of the class by the midpoint
    c. dividing the sample size by the frequency of the class
    d. dividing the frequency of the class by the sample size

ANSWER: d
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2

NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

18. The sum of the relative frequencies for all classes will always equal _____.
    a. the sample size
    b. the number of classes
    c. 1
    d. 100

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

19. The height and weight are recorded by the school nurse for every student in a school. What type of graph would best display the relationship between height and weight?
    a. bar graph
    b. stem-and-leaf plot
    c. histogram
    d. scatter diagram

ANSWER: d
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for Two Variables Using Graphical Displays
LEARNING OBJECTIVES: MBST.ASWC.18.02.04 - 2.4
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

20. The percent frequency of a class is computed by _____.
    a. multiplying the relative frequency by 10
    b. dividing the relative frequency by 100
    c. multiplying the relative frequency by 100
    d. adding 100 to the relative frequency

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Categorical Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.01 - 2.1
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

21. A dot plot can be used to display _____.

a. the relationship between two quantitative variables
b. the percent a particular category is of the whole
c. the distribution of one quantitative variable
d. Simpson's paradox

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

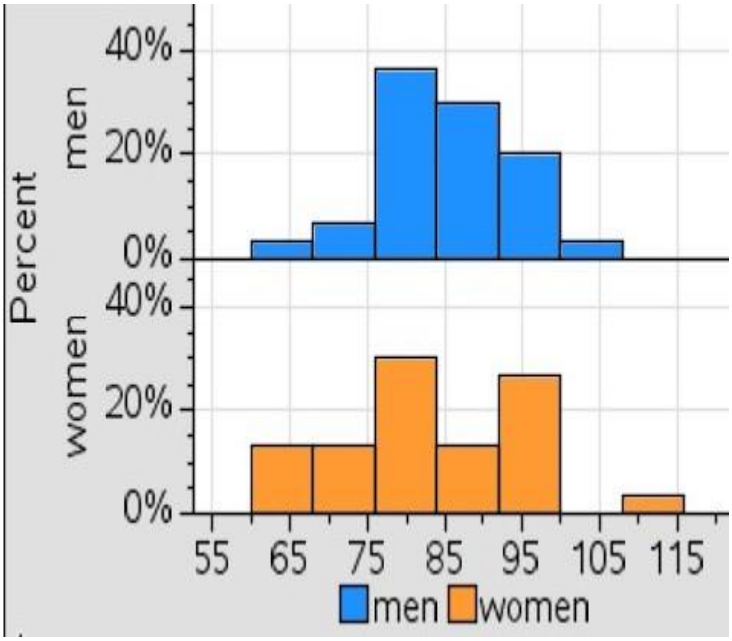
22. In a cumulative frequency distribution, the last class will always have a cumulative frequency equal to _____.
a. 1
b. 100%
c. the total number of elements in the data set
d. None of the answers is correct.

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

23. What is the difference between a bar graph and a histogram?
a. There is no difference between a bar graph and a histogram.
b. A histogram displays quantitative data, while a bar graph displays categorical data.
c. A histogram must have space between the bars, while a bar graph has no spaces between the bars.
d. None of the answers is correct.

ANSWER: b
POINTS: 1
DIFFICULTY: Moderate
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

24. College students were surveyed to determine how much they planned to spend in various categories during the upcoming academic year. One category is the amount spent on school supplies. The graphs below show the amount of money spent on school supplies by women and men.



Approximately what percent of women spend more than $105 on school supplies?

a. 5%
b. 10%
c. 15%
d. 20%

ANSWER: a
POINTS: 1
DIFFICULTY: Moderate
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

25. The difference between the lower class limits of adjacent classes provides the _____.

a. number of classes
b. class limits
c. class midpoint
d. class width

ANSWER: d
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Knowledge

Exhibit 2-1
The numbers of hours worked (per week) by 400 statistics students are shown below.

Number of Hours	Frequency
$0 \leq x < 10$	20
$10 \leq x < 20$	80
$20 \leq x < 30$	200
$30 \leq x < 40$	100

26. Refer to Exhibit 2-1. The class width for this distribution _____.

a. is 9

b. is 10

c. is 40, which is the largest value minus the smallest value or 40 − 0 =40

d. varies from class to class

ANSWER: b
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Summarizing Data for a Quantitative Variable
LEARNING OBJECTIVES: MBST.ASWC.18.02.02 - 2.2
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

27. Refer to Exhibit 2-1. The midpoint of the last class is _____.

a. 50

b. 34

c. 35

d. 34.5

ANSWER: c
POINTS: 1
DIFFICULTY: Moderate

Exhibit 2-4
A survey of 400 college seniors resulted in the following crosstabulation regarding their undergraduate major and whether or not they plan to go to graduate school.

Undergraduate Major

Graduate School	Business	Engineering	Other	Total
Yes	35	42	63	140
No	91	104	65	260
Total	126	146	128	400

51. Refer to Exhibit 2-4. What percentage of the students does not plan to go to graduate school?

a. 280%
b. 520%
c. 65%
d. 32%

ANSWER: c
POINTS: 1

55. A graphical device for depicting categorical data that have been summarized in a frequency distribution, relative frequency distribution, or percent frequency distribution is a(n) _____.

a. histogram
b. stem-and-leaf display
c. ogive
d. bar chart

ANSWER: d
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Data Visualization: Best Practices in Creating Effective Graphical Displays
LEARNING OBJECTIVES: MBST.ASWC.18.02.05 - 2.5
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

56. A graphical device for presenting categorical data summaries based on subdivision of a circle into sectors that correspond to the relative frequency for each class is a _____.

a. histogram
b. stem-and-leaf display
c. pie chart
d. bar chart

ANSWER: c
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Data Visualization: Best Practices in Creating Effective Graphical Displays
LEARNING OBJECTIVES: MBST.ASWC.18.02.05 - 2.5
NATIONAL STANDARDS: United States - Business Program.1: - Reflective Thinking
KEYWORDS: Bloom's: Comprehension

57. Categorical data can be graphically represented by using a(n) _____.

a. histogram
b. frequency polygon
c. ogive
d. bar chart

ANSWER: d
POINTS: 1
DIFFICULTY: Easy
REFERENCES: Data Visualization: Best Practices in Creating Effective Graphical Displays
LEARNING OBJECTIVES: MBST.ASWC.18.02.05 - 2.5

106. The SAT math scores of a sample of business school students and their genders are shown below.

SAT Math Scores

Gender	Less than 400	400 up to 600	600 and more	Total
Female	24	168	48	240
Male	40	96	24	160
Total	64	264	72	400

a. How many students scored less than 400?
b. How many students were female?
c. Of the male students, how many scored 600 or more?
d. Compute row percentages and comment on any relationship that may exist between SAT math scores and gender of the individuals.
e. Compute column percentages.

ANSWER:

a. 64
b. 240
c. 24
d.

	SAT Math Scores			
Gender	Less than 400	400 up to 600	600 and more	Total
Female	10%	70%	20%	100%
Male	25%	60%	15%	100%

From the above percentages, it can be noted that the largest percentages of both genders' SAT scores are in the 400 to 600 range. However, 70% of females and only 60% of males have SAT scores in this range. Also it can be noted that 10% of females' SAT scores are under 400, whereas 25% of males' SAT scores fall in this category.

e.

	SAT Math Scores		
Gender	Less than 400	400 up to 600	600 and more
Female	37.5%	63.6%	66.7%
Male	62.5%	36.4%	33.3%
Total	100%	100%	100%

POINTS: 1

107. A market research firm has conducted a study to determine consumer preference for a new package design for a particular product. The consumer's age was also noted.

	Package Design			
Age	A	B	C	Total
Under 25	18	18	29	65
25−40	18	12	5	35
Total	36	30	34	100

a. Which package design was most preferred overall?
b. What percent of those participating in the study preferred Design A?
c. What percent of those under 25 years of age preferred Design A?
d. What percent of those aged 25 − 40 preferred Design A?
e. Is the preference for Design A the same for both age groups?

ANSWER:
a. Design A
b. 36%
c. 27.7%
d. 51.4%
e. No, although both groups have 18 people who prefer Design A, the percentage of those in the "Under 25" age group who prefer Design A is smaller than that of the "25−40" age group (27.7% vs. 51.4%).

108. Partial results of a study follow in a crosstabulation of column percentages.

	Method of Payment		
Gender	Cash	Credit Card	Check
Female	18%	50%	90%
Male	82%	50%	10%
Total	100%	100%	100%

a. Interpret the 18% found in the first row and first column of the crosstabulation.
b. If 50 of those in the study paid by check, how many of the males paid by check?

ANSWER:
a. Of those who pay with cash, 18% are female.
b. 5

116. It is time for Roger Hall, manager of new car sales at the Maxwell Ford dealership, to submit his order for new Mustang coupes. These cars will be parked in the lot, available for immediate sale to buyers who are not special-ordering a car. Roger must decide how many Mustangs of each color he should order. The new color options are very similar to the past year's options.

Roger believes the colors chosen by customers who special-order their cars best reflect most customers' true color preferences. He has taken a random sample of 40 special orders for Mustang coupes placed in the past year. The color preferences found in the sample are listed below.

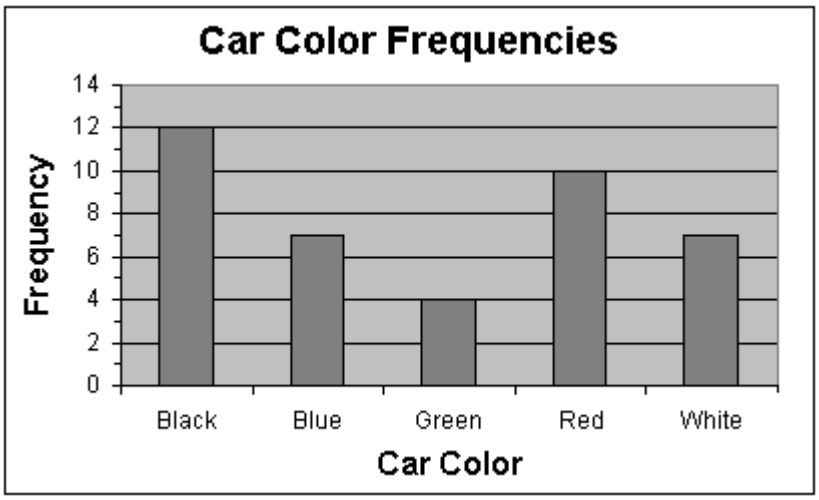
Blue	Black	Green	White	Black	Red	Red	White
Black	Red	White	Blue	Blue	Green	Red	Black
Red	White	Blue	White	Red	Red	Black	Black
Green	Black	Red	Black	Blue	Black	White	Green
Blue	Red	Black	White	Black	Red	Black	Blue

a. Prepare a frequency distribution, relative frequency distribution, and percent frequency distribution for the data set.
b. Construct a bar chart showing the frequency distribution of the car colors.
c. Construct a pie chart showing the percent frequency distribution of the car colors.

ANSWER: a.

Color of Car	Frequency	Relative Frequency	Percent Frequency
Black	12	0.300	30.0
Blue	7	0.175	17.5
Green	4	0.100	10.0
Red	10	0.250	25.0
White	7	0.175	17.5
Total	40	1.000	100.0

b.



c.

117. Missy Walters owns a mail-order business specializing in clothing, linens, and furniture for children. She is considering offering her customers a discount on shipping charges for furniture based on the dollar amount of the furniture order. Before Missy decides the discount policy, she needs a better understanding of the dollar amount distribution of the furniture orders she receives.

Missy had an assistant randomly select 50 recent orders that included furniture. The assistant recorded the value, to the nearest dollar, of the furniture portion of each order. The data collected are listed below.

136	281	226	123	178	445	231	389	196	175
211	162	212	241	182	290	434	167	246	338
194	242	368	258	323	196	183	209	198	212
277	348	173	409	264	237	490	222	472	248
231	154	166	214	311	141	159	362	189	260

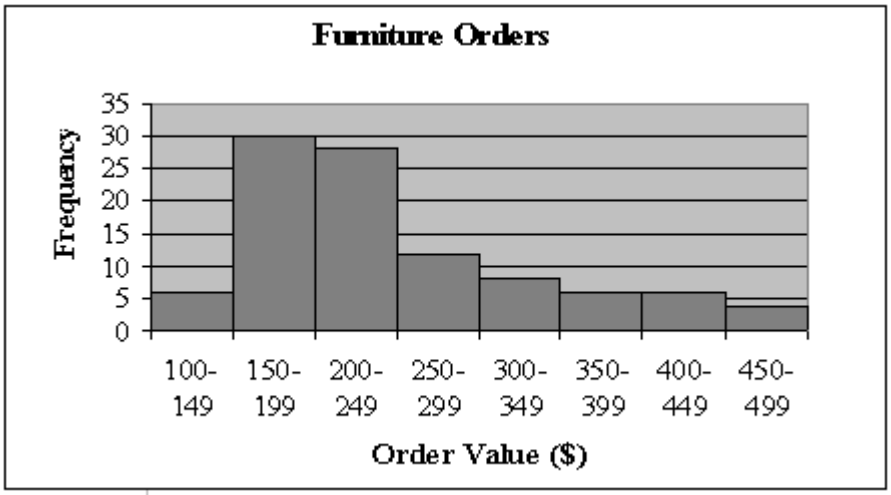
a. Prepare a frequency distribution, relative frequency distribution, and percent frequency distribution for the data set

using a class width of $50.
b. Construct a histogram showing the percent frequency distribution of the furniture-order values in the sample.
c. Develop a cumulative frequency distribution and a cumulative percent frequency distribution for these data.

ANSWER: a.

Furniture Order	Frequency	Relative Frequency	Percent Frequency
100−149	3	0.06	6
150−199	15	0.30	30
200−249	14	0.28	28
250−299	6	0.12	12
300−349	4	0.08	8
350−399	3	0.06	6
400−449	3	0.06	6
450−499	2	0.04	4

b.



c.

Furniture Order	Frequency	Cumulative Frequency	Cumulative Percent Frequency
100−149	3	3	6
150−199	15	18	36
200−249	14	32	64
250−299	6	38	76
300−349	4	42	84

119. Guests staying at Marada Inn were asked to rate the quality of their accommodations as being excellent, above average, average, below average, or poor. The ratings provided by a sample of 20 quests are shown below.

Below Average	Average	Above Average	Above Average
Above Average	Above Average	Above Average	Below Average
Below Average	Average	Poor	Poor
Above Average	Average	Above Average	Average
Excellent	Above Average	Average	Above Average

a. Provide a frequency distribution showing the number of occurrences of each rating level in the sample.

b. Construct relative frequency and percent frequency distributions for the data.

c. Display the frequencies graphically with a bar graph.

d. Display the percent frequencies graphically with a pie chart.

ANSWER: a.

Quality Rating	Frequency
Poor	2
Below Average	3
Average	5
Above Average	9
Excellent	1
Total	20

b.

Quality Rating	Relative Frequency	Percent Frequency
Poor	0.10	10
Below Average	0.15	15
Average	0.25	25
Above Average	0.45	45
Excellent	0.05	5
Total	1.00	100

c.

121. Tony Zamora, a real estate investor, has just moved to Clarksville and wants to learn about the local real estate market. He wants to understand, for example, the relationship between geographical segment of the city and selling price of a house, the relationship between selling price and number of bedrooms, and so on. Tony has randomly selected 25 house-for-sale listings from the Sunday newspaper and collected the data listed below.

Segment of City	Selling Price ($000)	House Size (00 sq. ft.)	Number of Bedrooms	Number of Bathrooms	Garage Size (cars)
Northwest	290	21	4	2	2
South	95	11	2	1	0
Northeast	170	19	3	2	2
Northwest	375	38	5	4	3
West	350	24	4	3	2
South	125	10	2	2	0
West	310	31	4	4	2
West	275	25	3	2	2
Northwest	340	27	5	3	3
Northeast	215	22	4	3	2
Northwest	295	20	4	3	2
South	190	24	4	3	2
Northwest	385	36	5	4	3
West	430	32	5	4	2
South	185	14	3	2	1
South	175	18	4	2	2
Northeast	190	19	4	2	2
Northwest	330	29	4	4	3
West	405	33	5	4	3
Northeast	170	23	4	2	2
West	365	34	5	4	3
Northwest	280	25	4	2	2
South	135	17	3	1	1
Northeast	205	21	4	3	2
West	260	26	4	3	2

a. Construct a crosstabulation for the variables segment of city and number of bedrooms.

b. Compute the row percentages for your crosstabulation in part (a).

c. Comment on any apparent relationship between the variables.

ANSWER: a. CROSSTABULATION

Count of Home	Number of Bedrooms				
Segment of City	2	3	4	5	Grand Total
Northeast	0	1	4	0	5
Northwest	0	0	4	3	7
South	2	2	2	0	6
West	0	1	3	3	7
Grand Total	2	4	13	6	25

b. ROW PERCENTAGES

Percent of Home	Number of Bedrooms				
Segment of City	2	3	4	5	Grand Total
Northeast	0.0	20.0	80.0	0.0	100.0
Northwest	0.0	0.0	57.1	42.9	100.0
South	33.3	33.3	33.3	0.0	100.0
West	0.0	14.3	42.9	42.9	100.1

c. We see that fewest bedrooms are associated with the South, and the most bedrooms are

associated with the West and particularly the Northwest.
