127) For what type of organization might the location decision area be the least important of its ten decision areas? For what type of organization might the location decision be the most important of the ten decision areas? Discuss; include examples.

Answer: The relationship between the organization and its suppliers or its customers is key. If that relationship is very weak (as in no transportation costs, or customers can reach the firm from any location), location diminishes in importance. If that relationship is strong (uniqueness of site, high transportation costs, customers will not travel far) location increases in importance. "Least" examples: Telemarketing firm, tax help-line, Internet sales. "Most" examples: gold mine, oil well, ski resort.

130) Identify and explain the four basic global operations strategies. Give an example of each strategy.

Answer:

- The multidomestic strategy decentralizes operating decisions to each country to enhance local responsiveness. The primary example from the textbook is McDonald's.
- The global strategy centralizes operating decisions, with headquarters coordinating the standardization and learning between facilities. The textbook names Texas Instruments and Caterpillar.
- The international strategy uses exports and licences to penetrate the global markets. Students may cite Pier One, Harley-Davidson, or any wine store.
- The transnational strategy exploits the economies of scale and learning, as well as pressure for responsiveness, by recognizing that core competence does not reside in just the "home" country, but can exist anywhere in the organization. Examples from the textbook include Coca-Cola and Nestlé.

131) Nike is the world's largest athletic brand. Its innovative and broad product line helps drive sales; however, a large majority of those sales are in the footwear business. Most of Nike's goods are produced overseas in low-cost factories and then imported to the final market. Nike currently has many of the top U.S. athletes under contract (Michael Jordan, Tiger Woods, Dwyane Wade) but international sales are still small in emerging markets. However, many competitors have attempted to copy Nike's business model (high-value branded products manufactured at low-cost), including Adidas and Reebok, while many retailers have attempted to pass on the low-cost pressure of retail consumers. Perform a SWOT analysis for Nike.

Answer:

Strengths: Innovative products, athletes under contract.

Weaknesses: Much of revenue is from footwear; eroding market share could cost Nike its profitability.

Opportunities: Sales can be increased in emerging markets using well-known athletes; broad product line can be expanded into high profit sectors (jewelry, sunglasses, golf, etc.).

Threats: International business makes Nike vulnerable to currency changes; low-cost pressure from retailers can decrease profit per item; competition could erode existing market share. Athletes' personal lives could weaken Nike's reputation.

132) Starbucks is one of the best known coffeehouse chains in the world. Each store sells a variety of innovative products to complement the array of coffee choices available. However, 75% of current stores are located in the United States and the expensive nature of the coffee leaves Starbucks vulnerable to changes in consumer spending behaviour (such as recessions). Recently Starbucks has begun initiatives to sell its specialty coffee beans for home use, presenting a chance for a large increase in revenue and diversification. However, Starbucks faces fierce competition seeking a piece of its lucrative market share and the threat of consumer behaviour changes, given its reputation rides on a singular product. Perform a SWOT analysis for Starbucks.

Answer:

Strengths: High profit specialty coffee, well known brand image.

Weaknesses: Most stores located in U.S., most profits come from coffee (both indicate a lack of diversification).

Opportunities: Emerging market in coffee beans for home use, chance for global expansion.

Threats: Intense competition, consumer behaviour changes (less spending during a recession on its luxury coffee, change in beverage preferences).

133) Boeing's 787 Dreamliner is a state-of-the-art airplane reflecting the global nature of business in the 21st century and one of the fastest-selling commercial jets in history. It incorporates the latest in a wide range of aerospace technologies including an innovative electronic monitoring system and advances in engine technology that increased fuel efficiency by 8%. Boeing teamed with more than 20 international systems suppliers from over a dozen countries. These partners not only spread the risk but also bring commitment to the table because countries that have a stake in the 787 are more likely to buy from Boeing. Perform a SWOT analysis of Boeing's 787 Dreamliner.

Answer:

Strengths: Technological advances (8% increase in fuel efficiency, electronic maintenance monitoring).

Weaknesses: Diverse suppliers and assembly locations leave Boeing vulnerable to currency exchange rates and make quality control difficult.

Opportunities: One of fastest-selling commercial jets ever gives Boeing a chance to increase market share; Boeing can parlay its use of diverse supplier locations into diversifying customer base.

Threats: Competition from Airbus, divestment of the manufacture process risks losing company trade secrets (competitive advantage).

134) Hard Rock opened its first restaurant in London in 1971, making it the granddaddy of theme restaurants. Hard Rock has millions of dollars invested in Rock 'n' Roll memorabilia. It employs an "experience strategy" in its 150 restaurants located in 53 countries. Efficient kitchen layouts, motivated personnel, tight schedules and the right ingredients at the right place and time to delight the customers. Perform a SWOT analysis of Hard Rock Café.

Answer:

Strengths: Hard Rock's unique coupling of an experience with its menu gives it a competitive advantage, diverse portfolio of stores in 53 countries lowers risk.

Weaknesses: Hard Rock is known exclusively for its "experience"; this one-dimensional competitive advantage presents high risk.

Opportunities: New "experience" types at restaurants (Blues, Hip-Hop, etc., themes), addition of new stores to the existing 150+ stores.

Threats: Hard Rock's exclusive Rock 'n' Roll theme leaves it vulnerable to changes in consumer music preferences; competition in the restaurant business is very tough.

135) Franz Colruyt is a Belgian discount food retailer that is obsessed with cutting costs. Cost cutting measures in its 160 stores include no bags or in-store music, dimly-lit stores, unpaid 5-minute coffee breaks for employees, and a spartan headquarters. The resulting 6.5% profit margin dwarfs the 1% to 2% margin typical for the industry. Perform a SWOT analysis for Franz Colruyt.

Answer: Strengths: High profit margin of 6.5% from its extreme low-cost competitive advantage.

Weaknesses: Lack of bagging, in-store music, dim lighting, and lack of aesthetic in-store appeal all limit potential customer base.

Opportunities: Franz Colruyt only operates 160 stores, so there is opportunity for global expansion.

Threats: High profit margin might encourage competition to copy Franz Colruyt's low-cost competitive advantage, eroding it. Changes in consumer behaviour (increased prosperity) might decrease customers interested in only a low-cost alternative.
