- ProQuest
 - PsycArticles
 - ERIC
 - SSCI

ANS: d KEY: www

6. _____ is a resource that allows you to search for subsequent articles from disciplines such as biology, chemistry, or medicine that have cited a key article.
- ProQuest
 - SSCI
 - ERIC
 - SCI

ANS: d

7. Which of the following represents the correct order for the sections in an APA format paper?
- Abstract, Introduction, Results, Method, Discussion
 - Abstract, Introduction, Method, Results, Discussion
 - Abstract, Introduction, Discussion, Method, Results
 - Abstract, Discussion, Introduction, Method, Results

ANS: b

8. The _____ section provides an introduction to the problem, a review of previous research, and the rationale for the current study.
- Method
 - Introduction
 - Results
 - Discussion

ANS: b

9. The _____ section describes exactly how the study was conducted in sufficient detail that a person who read it could replicate the study.
- a. Method
 - b. Results
 - c. Introduction
 - d. Discussion

ANS: a

10. A review of previous research is to the _____ section as describing how the study was conducted is to the _____ section.
- a. Introduction; Results
 - b. Results; Method
 - c. Introduction; Discussion
 - d. Introduction; Method

ANS: d

11. The _____ section is a very brief description of the entire paper.
- a. Method
 - b. Results
 - c. Introduction
 - d. Abstract

ANS: d

12. A very brief description of the entire paper is to the _____ section as a review of previous research is to the _____ section.
- a. Abstract; Introduction
 - b. Introduction; Method
 - c. Abstract; Results
 - d. Results; Introduction

ANS: a KEY: www

13. The _____ section summarizes the data collected and the type of statistics used to analyze the data.
- a. Method
 - b. Results
 - c. Introduction
 - d. Discussion

ANS: b

14. A summary of the data collected and the type of statistics used to analyze the data is to the _____ section as a very brief description of the entire paper is to the _____ section.
- a. Results; Introduction
 - b. Introduction; Abstract
 - c. Results; Abstract
 - d. Discussion; Abstract

ANS: c

15. In the _____ section, the results are evaluated, interpreted, and related to past research and theories.
- a. Method
 - b. Results
 - c. Introduction
 - d. Discussion

ANS: d

16. An evaluation and interpretation of the results is to the _____ section as describing how the study was conducted is to the _____ section.
- a. Method; Results
 - b. Discussion; Method
 - c. Discussion; Abstract
 - d. Abstract; Method

ANS: b

17. When Milgram informed the participants in his study that it was on learning and memory, rather than obedience, he utilized
- a. psychological harm.
 - b. informed consent.
 - c. debriefing.
 - d. deception.

ANS: d

18. If a researcher told participants that her study was about visual perception rather than what it is really on, conformity, she would be utilizing:
- a. debriefing
 - b. no risk
 - c. an informed consent
 - d. deception

ANS: d KEY: www

19. The Tuskegee syphilis study is the most glaring example of failure to
- a. obtain informed consent.
 - b. use deception properly.
 - c. use debriefing.
 - d. comply.

ANS: a

20. _____ refers to explaining the purpose of a study to participants after completion of data collection.
- a. Debriefing
 - b. Informed consent
 - c. Deception
 - d. none of the above

ANS: a

21. _____ refers to explaining the purpose of a study to participants after completion of data collection, and _____ refers to not telling the participants the truth about the purpose of the study.
- Deception; debriefing
 - Debriefing; informed consent
 - Informed consent; debriefing
 - Debriefing; deception

ANS: d KEY: www

22. To ensure ethical standards, research proposals are typically reviewed by
- an ethics committee.
 - an institutional review board.
 - a deception and debriefing board.
 - all of the above

ANS: b

23. An _____ helps to determine whether participants are _____ or _____.
- IRB; debriefed; not
 - IRB; at risk; at minimal risk
 - informed consent; debriefed; not
 - informed consent; at risk; at minimal risk

ANS: b

24. A committee charged with evaluating research projects in which human participants are used is a(n)
- Institutional Review Board.
 - Informed Consent Committee.
 - Debriefing Committee.
 - Anti-deception Board.

ANS: a

25. A form given to individuals before they participate in a study to inform them of the general nature of the study and to obtain their consent to participate is a(n)
- IRB Form.
 - Informed Consent Form.
 - Debriefing Form.
 - Compliance Form.

ANS: b

26. Providing information about the true purpose of a study as soon after the completion of data collection as possible is referred to as
- the anti-deception technique.
 - compliance.
 - debriefing.
 - informed consent.

ANS: c

27. _____ risk research is defined as research involving no more risk than that encountered in daily life or during the performance of routine physical or psychological examinations or tests.
- Moderate
 - No
 - High
 - Minimal

ANS: d

28. If confidentiality is compromised, then human participants
- are considered at risk.
 - are most definitely not at risk.
 - should not be used in the study.
 - are at risk and should not be used in the study.

ANS: a KEY: www

29. When children are used as research participants
- informed consent is not necessary.
 - informed consent must be obtained from the parents or legal guardians.
 - confidentiality does not matter.
 - the issue of “risk” is not important.

ANS: b

30. The APA guidelines address several issues with respect to animal welfare. These include all of the following EXCEPT
- a justification for the study must be provided.
 - the researchers must ensure that the care and housing of the animals meets federal regulations.
 - the animals may be acquired from any source.
 - the personnel interacting with the animals are well trained.

ANS: c

Short Answer/Essay Questions

1. Explain the difference in use between the Psychological Abstracts and the Social Science Citation Index.

The Psychological Abstracts allow you to search based on topic. Thus, one can search the abstracts for a certain topic along with other parameters such as date or type of publication. The Social Science Citation Index allows one to search for subsequent articles that have cited a key article.

2. Explain what deception and debriefing are.

Deception involves lying to the participants concerning the true nature of a study because knowing the true nature of the study might affect their performance. Debriefing involves providing information about the true purpose of a study as soon after the completion of data collection as possible.

3. When is it acceptable to use deception in a research study?

Psychologists only use deception in a research study when they have determined that the use of deceptive techniques is justified by the study's significant prospective scientific, educational, or applied value and that effective nondeceptive alternative procedures are not feasible.

4. Participants can be classified as “at risk” or “at minimal risk”. What is the difference?

Participants “at minimal risk” are placed under no more physical or emotional risk than would be encountered in daily life or in routine physical or psychological examinations or tests.

Participants “at risk” are those at risk for physical or emotional harm or those whose privacy is compromised—in other words, the results from the study are not completely confidential.
