SHORT ANSWER

1. At the end of a safari, the tour guide asks the vacationers to respond to the questions listed below. For each question, determine whether the possible responses are interval, nominal, or ordinal.
 - a. How many safaris have you taken prior to this one?
 - b. Do you feel that your tour safari lasted sufficiently long (yes/no)?
 - c. Which of the following features of the accommodations did you find most attractive: location, facilities, room size, service, or price?
 - d. What is the maximum number of hours per day that you would like to spend traveling?
 - e. Is your overall rating of this safari: excellent, good, fair, or poor?

ANS:

- a. Interval
- b. Nominal
- c. Nominal
- d. Interval
- e. Ordinal

PTS: 1 DIF: Moderate OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

2. Before leaving a particular restaurant, customers are asked to respond to the questions listed below. For each question, determine whether the possible responses are interval, nominal, or ordinal.
 - a. What is the approximate distance (in miles) between this restaurant and your residence?
 - b. Have you ever eaten at this restaurant before?
 - c. On how many occasions have you eaten at the restaurant before?
 - d. Which of the following attributes of this restaurant do you find most attractive: service, prices, quality of the food, or the menu?
 - e. What is your overall rating of the restaurant: excellent, good, fair, or poor?

ANS:

- a. Interval
- b. Nominal
- c. Interval
- d. Nominal
- e. Ordinal

PTS: 1 DIF: Moderate OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

3. For each of the following examples, identify the data type as nominal, ordinal, or interval.
 - a. The final grade received by a student in a neuro-science class.
 - b. The number of students in a Physics course.
 - c. The starting salary of a PhD graduate.
 - d. The size of an order of fries (small, medium, large, super-size) purchased by a Burger

- King customer.
- e. The college you are enrolled in (Arts and Sciences, Business, Education, etc.).

ANS:

- a. Ordinal
- b. Interval
- c. Interval
- d. Ordinal
- e. Nominal

PTS: 1 DIF: Moderate OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

4. For each of the following, indicate whether the variable of interest is nominal or interval.
- a. Your marital status.
 - b. Whether you are a U.S. citizen.
 - c. Sally's travel time from her dorm to the student union on campus.
 - d. The amount of time you spent last week on your homework.
 - e. The number of cars parked in a certain parking lot at any given time.
 - f. Kate's favorite brand of sneakers.

ANS:

- a. Nominal
- b. Nominal
- c. Interval
- d. Interval
- e. Interval
- f. Nominal

PTS: 1 DIF: Moderate OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

5. Provide one example of ordinal data; one example of nominal data; and one example of interval data.

ANS:

Ordinal data example: Response to a market research survey question measured on the Likert scale using the code: 1 = strongly agree, 2 = agree, 3 = neutral, 4 = disagree, and 5 = strongly disagree.

Nominal data example: Voters' political party affiliation for using the code: 1 = Democrat, 2 = Republican, and 3 = Independent.

Interval data example: The temperature on a golf course during the U.S. Master's Tournament. (degrees Fahrenheit).

PTS: 1 DIF: Moderate OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

6. Explain why religious preference is not an ordinal variable.

ANS:

The values of religious preference cannot be ranked in order in any way.

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

7. Explain the difference between ordinal data and interval data.

ANS:

The critical difference between them is that the intervals or differences between values of interval data are consistent and meaningful. That is, we can calculate the difference and interpret the results. Because the codes representing ordinal data are arbitrarily assigned except for the order, we cannot calculate and interpret differences.

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

8. Give an example of interval data that can also be treated as ordinal data and nominal data.

ANS:

Example: Your actual age is interval data; your age group (1-17; 18-24; 25-30; etc.) is ordinal data; and whether or not you are over age 25 is nominal data.

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.01
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

9. A bar chart is used to represent interval data.

ANS:

F

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

10. One of the advantages of a pie chart is that it clearly shows that the total percentages of all the categories add to 100%.

ANS:

T

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

11. Bar and pie charts are graphical techniques for nominal data. The former focus the attention on the *frequency* of the occurrences of each category, and the later emphasizes the *proportion* of occurrences of each category.

ANS:
T

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

12. A relative frequency distribution lists the categories and their counts.

ANS:
F

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

13. A frequency distribution lists the categories and the proportion with which each occurs.

ANS:
F

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

14. From a pie chart you are able to find the frequency for each category.

ANS:
F

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

15. Which of the following statements about pie charts is false?
- A pie chart is a graphical representation of a relative frequency distribution.
 - You can always determine frequencies for each category by looking at a pie chart.
 - The total percentage of all the slices of a pie chart is 100%.
 - The area of a slice of a pie chart is the proportion of all the individuals that fall into that particular category.

ANS:
B

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

16. Which of the following situations is best suited for a pie chart?
- The number of dollars spent this year on each type of legal gambling.
 - The percentage of a charitable donation that goes to administrative costs vs. directly to the charity.

- c. The number of students in your class who received an A, B, C, D, F on their exam.
d. All of these choices are true.

ANS:
 B

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
 NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
 KEY: Bloom's: Comprehension

17. Which situation identifies when to use pie charts and/or bar charts?
 a. You want to describe a single set of data.
 b. Your data is nominal.
 c. You want to show the number or the percentage of individuals in each category.
d. All of these choices are true.

ANS:
 D

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
 NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02

KEY: Bloom's: Knowledge

23. A(n) _____ chart is often used to display frequencies; a(n) _____ chart graphically shows relative frequencies.

ANS:
bar; pie

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

24. A pie chart shows the _____ of individuals that fall into each category.

ANS:

percentage
relative frequency
proportion

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

25. We can summarize nominal data in a table that presents the categories and their counts. This table is called a(n) _____ distribution.

ANS:

frequency

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

26. A(n) _____ distribution lists the categories of a nominal variable and the proportion with which each occurs.

ANS:

relative frequency

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

27. A(n) _____ chart is not able to show frequencies. It can only show relative frequencies.

ANS:

pie

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

28. In a pie chart, each slice is proportional to the _____ of individuals in that category.

ANS:

percentage
proportion
relative frequency

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

29. A category in a pie chart that contains 50% of the observations is represented by a slice of the pie that is equal to _____ degrees.

ANS:
180

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Comprehension

30. Identify the type of data for which each of the following graphs is appropriate.

- a. Pie chart
- b. Bar chart

ANS:

- a. Nominal
- b. Nominal

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Knowledge

31. Twenty-five voters participating in a recent election exit poll in Minnesota were asked to state their political party affiliation. Coding the data as R for Republican, D for Democrat, and I for Independent, the data collected were as follows: I, R, D, I, R, I, I, D, R, I, I, D, R, R, I, D, I, R, I, D, I, D, R, R, and I. Construct a frequency bar chart from this data. What does the bar chart tell you about the political affiliations of those in this sample?

ANS:

The bar graph shows most of the people surveyed were Independents (11 out of 25 = 44.0%); Republications followed with $8/25 = 32.0\%$ and Democrats made up 6 of the 25, or 24.0%.

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Application

Car Buyers

Forty car buyers were asked to indicate which car dealer offered the best overall service. The four choices were Contour Motors (C), Modern Chrysler (M), Tonneau Auto (T), and Uncanny Chevrolet (U). The following data were obtained:

T	C	C	C	U	C	M	T	C	U
U	M	C	M	T	C	M	M	C	M
T	C	C	T	U	M	M	C	C	T
T	U	C	U	T	M	M	C	U	T

32. {Car Buyers Narrative} Construct a frequency bar chart of this data. Which car dealer came in last place in terms of overall service?

ANS:

Uncanny Chevrolet (U) received the fewest votes for best overall service (7 out of 40, or 17.5%) and came in last place.

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
 NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
 KEY: Bloom's: Application

33. {Car Buyers Narrative} Construct a pie chart of this data. Which car dealer offered the best overall service?

ANS:

ContourMotors (C) received the most votes (35.0%).

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
 NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
 KEY: Bloom's: Application

Business School Graduates

A sample of business school graduates were asked what their major was. The results are shown in the following frequency distribution.

Major of Graduates	Number of graduates
Accounting	58
Finance	42
Management	38
Marketing	52
Other	10

34. {Business School Graduates Narrative} How many graduates were surveyed?

ANS:
 200; you get this by totaling the counts for each major.

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
 NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
 KEY: Bloom's: Application

35. {Business School Graduates Narrative} Draw a pie chart to summarize this data. Which major was the most popular?

ANS:

The most popular major was accounting (29%), followed by marketing (26%).

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.02
 NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
 KEY: Bloom's: Application

36. {Business School Graduates Narrative} If you were only given the frequency bar chart below, would you be able to reconstruct the original observations in the data set?

ANS:

No; you cannot reconstruct the original data from this graph because the scale on the frequency (Y) axis is not precise enough. For example, you can't tell exactly what number of students majored in finance; it appears to be 40 on this bar chart, but the actual value is 42, as seen on the original table.

38. Suppose you measure the number of minutes it takes an employee to complete a task, where the maximum allowed time is 5 minutes, and each time is rounded to the nearest minute. Data from 130 employees is summarized below. Construct a frequency bar chart and a pie chart from this data. How long did it take most employees to complete the task?

Time (minutes)	1	2	3	4	5
Frequency	15	30	40	25	20

ANS:

The most common time to complete the task was 3 minutes, which was recorded for 40 of the 130 (31%) of the employees.

All-Nighters

A sample of 400 students at a certain university was taken after the midterm; 200 students reported staying up all night before the midterm and the other 200 students did not. Researchers recorded whether each student did well or poorly on the midterm. The following table contains the results.

	Did Well on Midterm	Did Poorly on Midterm
Stayed up all night	60	140
Did not stay up all night	120	80

63. {All-Nighter Narrative} Of those who stayed up all night before the midterm, what percentage did well on the midterm?

ANS:

$$60/200 = 30\%$$

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.03
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Application

64. {All-Nighters Narrative} Of those who did well on the midterm, what percentage stayed up all night before the midterm?

ANS:

$$60/180 = 33.3\%$$

PTS: 1 DIF: Easy OBJ: SFME.KELL.15.02.03
NAT: BUSPROG.SFME.KELL.15.03 STA: DISC.SFME.KELL.15.02
KEY: Bloom's: Application

65. {All-Nighters Narrative} Briefly explain (using percentages) whether staying up all night before this midterm is related to a student doing poorly.

ANS:

Yes, they are related. Of those staying up all night, $140/200 = 70\%$ did poorly. Of those who didn't stay up all night, $80/200 = 40\%$ did poorly. Staying up all night before this midterm is associated with lower performance.

PTS: 1 DIF: Moderate OBJ: SFME.KELL.15.02.03
